Steps To use

Wear protective gloves before application.

Squeeze the entire sachet into your gloves palms, then apply onto hair.

Use a wide-toothed comb to comb through the hair from root till the ends.

After application leave the gel on the hair for 10-15 mins. For darker shades wait for extra 5 mins.

Rinse hair thoroughly with water and style as usual.

Paracolors

Our products adopt the new caring formula. They are rich in fruit extracts and soft in texture.

It also contains SPA elements from plant sources, silicon polymer and vitamin B which can penetrate deeply into the hair and restructure the hair effectively in order to make perfect covering of the greys. With obvious effects and never clinging to your scalp, our highly efficient color-locking factor can consolidate the color chain of the dyed hair.

At the same, our product provide you with high quality nourishing result that keeps our hair color long-lasting and non-fading. After dyeing, your hair can remain bright and smooth, even soft enough to comb, and stay in natural color that won't fade.

Caution

The ingredients in this product may cause skin irritation in certain individuals. A hypersensitivity (patch) test is strongly advised before each use. Do not use this product for dyeing eyelashes or eyebrows, as it may cause blindness.

Avoid contact with eyes. In case of accidental contact, rinse immediately with plenty of water and seek medical advice.

This product makes no therapeutic claims whatsoever.

Keep out of reach of children.

Any damage or claims resulting from misuse of this product will not be accepted.

Keep eyes and mouth closed while washing hair. Do not use if your scalp is sore, cut, or affected by any skin condition.

POISON-For external use only.

Ingredients list:-

(Colorant), Carbopol, Aqua (Water), Para-phenylenediamine, Resorcinol, Sodium Metabisulphite, O-Aminophenol, EDTA, Urea, Hydrogenated Castor Oil, p-Methylaminophenol (PMP), Propylene Glycol, Monoethanolamine (MEA), m-Aminophenol, Perfume (Fragrance) Proprietary.

(Developer or Base Gel), Aqua (Water), EDTA Phenoxylethanol, Glycerin, Polysorbate, Phosphoric acid, Carbopol, Sodium Stannate, Perfume (Fragrance) Proprietary.

Hypersensitivity test

Always perform a preliminary test to determine if your skin is prone to sensitivity. To carry out the test:

1. Clean a small area of skin behind the ear.
2. Apply a small quantity of the product to that area.
3. Allow it to dry for 24 hours.
4. If any swelling, itching or redness occurs, do not use the product. Perform this test before each and every application.

Attention: Always use hand gloves during application, or wash your hands within 2 minutes after use.
