WEEE RECYCLING

E-WASTE MANAGEMENT

E-Waste recycling is the process of recycling worn-out electronic and electrical equipment into new and useful products. If handled cautiously, E-Waste recycling helps in keeping our environment green. It helps in the conservation of our natural resources as many important metals for the manufacturing of new products can be recovered from E-Waste recycling. It also reduces the problem of landfill and also helps in providing technology to a large number of people as these recycled products are cost-effective. Green World Shri Raam Recycling is the company that offers safe and reliable disposal of e-waste. The Govt. of India as well as the Pollution Control Board has certified the company. It has constant surveillance mechanisms like CCTV monitors etc. Our recycling process does not cause sound pollution and contamination of air and water.

Wastage Management.

Customer - Relationship Management.

Special Training to our employees.

ADVANTAGES OF RECYCLING Recycling raw materials from end-of-life electronics is the most effective solution to the growing e-waste problem. Most electronic devices contain variety of materials, including metals that can be recovered for future uses. The recycling of e-waste helps in keeping natural resources intact that avoids air and water pollution caused by hazardous disposal. It helps in keeping the environment green if these materials are managed cautiously.
