Since its establishment in the year 1982, our company has strived to provide clients with the best quality products. The company is managed by Mr. S. Surender Kumar, who has 30 years of experience in the industry.

Infrastructure :

We have state-of-the-art machinery, tools and equipment for the production of our goods. We have managed to improve our productivity and supply owing to the continual development of techniques for the process of production. We have a monthly production capacity of 20 tons and a sales volume of 1200 units for Hammers & 2500 units for Bits. Our products are developed using high grade EN 36C (MUSCO), EN 353, EN 19, etc.

Quality Assurance :

We assure our clients of the fact that all our products are manufactured using high quality materials and processed using the most advanced technology. Also, our range of products is passed through several quality control tests and analysis to eliminate the scope for flaws and ensure the qualities of dimensional accuracy, corrosion resistance & durability. Our company also has good logistics facility that ensures quick and safe delivery of products.

Team :

Our team of experienced engineers, equipment designers, marketing executives and supervisors assures that our products work perfectly for the applications they are designed. Also, we have a research and development team that works on newer and better technologies available and records researches made by them for further references.

Coal Drilling Bits

Application : Drilling Tools

Color : Blue, Yellow

Feature : Easy To Operate, High Performance, High Strength

Automatic Grade : Automatic

Driven Type : Hydraulic

Double Step Button Bits

Type : Button Bits

Material : Carbide

Application : Drilling Tools

Weight : 100-1000kg

Feature : High Performance, High Strength, Highly Durable

Taper Button Bits

Type : Button Bits

Application : Drilling Tools

Weight : 100-1000kg

Feature : Easy To Operate, Highly Durable, Sturdy Construction

Automatic Grade : Automatic

Tricone Drilling Bits

Material : Steel

Thickness : 10-20gm

Length : 10-15cm

Color : Silver

Feature : Easy Fitting, Heat Resistance, Rust Proof, Sharp Edge

Button Drilling Bits

Application : Drilling Tools

Color : White

Feature : High Performance

Size : Available in Different Sizes

Processing Type : Forging

DTH Button Bits

Application : Drilling Tools

Color : Black

Feature : Durable, Low maintenance, Competitive prices, Highly efficient

Size : Available in Various Sizes

Finish : Coated

Drilling DTH Bits

Material : Carbide

Color : Black

Feature : High Performance, High Strength

Application : Drilling Tools

Finish : Coated

Retrac Drilling Bits

Features : High tensile strength, Low maintenance, Highly durable, Reasonable price

Surface Finishing : Coated

Usage : Drilling

Color : Yellow

Size : 4-5 inch, 3-4 inch

DTH Hammers

Application : DTH Use

Condition : New

Finishing : Polished

Handle Material : Metal

Features : Durable, Fully Heat-treated,
Polished Bell Face, Precision Balanced

Shank Adaptors

Material : Metal

Use : 2inch, 4inch, 6inch, 8inch

Thickness : 0-5mm, 5-10mm, 10-15mm

Color : All Color

Condition : New

Drilling Bit Faces

Use : Drilling Tools

Color : Yellow

Features : High Strength, Sturdy Construction

Size : Available in Different Sizes

Finish : Coated

Valveless Air Hammer

Application : DTH Use

Condition : New

Finishing : Polished

Handle Material : Metal

Features : Durable, Fully Heat-treated, Magnetic Nail Start, Polished Bell Face, Precision Balanced

Drill Hammer Assembly

Length (mm) : 30-60 mm

Use : Well Drilling

Features : Extensively used, Highly reliable

Thickness : 5-10mm

Diameter : Upto 150mm
