Nature of Business
Manufacturer, Exporter & Supplier

Year of Establishment
1982

Laxmi Rock Drills, based in Hyderabad, Andhra Pradesh, is a Manufacturer, Supplier and Exporter of high quality Machining Tools. The range of products provided by us has been appreciated in the international market for its quality and efficiency. Since its establishment in the year 1982, our company has strived to provide clients with the best quality products. the company is managed by Mr. S. Surender Kumar, who has 30 years of experience in the industry.

Infrastructure :

We have state-of-the-art machinery, tools and equipment for the production of our goods. We have managed to improve our productivity and supply owing to the continual development of techniques for the process of production. We have a monthly production capacity of 20 tons and a sales volume of 1200 units for Hammers & 2500 units for Bits. Our products are developed using high grade EN 36C (MUSCO), EN 353, EN 19, etc.

Quality Assurance :

We assure our clients of the fact that all our products are manufactured using high quality materials and processed using the most advanced technology. Also, our range of products is passed through several quality control tests and analysis to eliminate the scope for flaws and ensure the qualities of dimensional accuracy, corrosion resistance & durability. Our company also has good logistics facility that ensures quick and safe delivery of products.

Team :

Our team of experienced engineers, equipment designers, marketing executives and supervisors assures that our products work perfectly for the applications they are designed. Also, we have a research and development team that works on newer and better technologies available and records researches made by them for further references.
