SUPER ENGINEERING WORKS

ISO 9001:2008 Certified

BEST QUALITY PRODUCTS

Super Engineering Works is an ISO 9001:2008 Certified Company Manufactures and Exporters of Electrical Control & Signaling Devices. Our range of Electrical Control & Signaling Devices comprises of Cam Rotary Switches, Electrical Control Panel Accessories, HRC Fuse Base, HRC Fuse Carrier, Limit Switches, On Load Changeover Switches, Toggle Switches and many more. Our products meet international quality standards and sell under the brand name: DV & SURDHI and are accredited with CE from ASQR India Pvt. Ltd. Our products are used and tested at various departments in Government and public sector such as CPWD, NSIC, Northern Railway, RCF, RDSO, RIL, PGCL, ONGC, Nagarjuna Construction Company LTD. HMT, PSL LTD. and so on.

To this effect, we have aggressively upgraded technology, creating facilities that are state-of-the-art, varied and expansive. Our products line is extensive besides being a leader in the domestic market and supplier to prestigious companies in the country, we have made substantial foray in the global market, and exports abroad continue to grow steadily. Yet, we firmly believe, we have a long way to go. Hence, our continuous zest towards product innovation and technology & process up gradation.

ABOUT US

Super Engineering Works is a Delhi (India) based company established in the year 1988. Under the headship of Mr. Ravi Dhiman and Mr. Vipin Dhiman (the Partners of the company), who holds a vast experience of 30 years in this domain, the company has marked its success across the nation. Today, the company is widely recognized in the international market (Europe, USA, Canada and so on) for its finest quality products and on time delivery.

History

1982 saw the inception of a small business which began with tool making, manufacturing and marketing audio–video accessories and computer - UPS parts. The years since, have been a time of consolidation, branching out and astounding growth. The company has since moved on to become diversified and highly global - yet always the quality conscious enterprise.

INFRASTRUCTURE

We are backed with well developed infrastructure in an area of 360 Sq. meters that consists of various advanced machines such as Automatic Plastic Injection Molding Machines, Bakalite Molding Machines, Press Shop, Well Equipped Tool Room, and so on. Our manufacturing process spans over several facilities and are to a large extent integrated, wherein in materials, design, development, automated in house tooling, precision machining and automatic injection molding machines, all work in synergy.

These guarantee precision and maximize mechanical work. Assembly line ensures product consistency, reliability and hence the ability to meet delivery schedules.

Our design & development facility is amply geared with complete range of software and operating platforms such as CAD/CAM to fulfill varied customer requirements.

Our products as well as incoming raw material undergo specified stringent tests. Apart from our own R&D Center, our products are tested at the

Electrical Research & Development Association (ERDA), Vadodara and the Electronics Regional Test Laboratory (ERTL), New Delhi.

Apart from our existing products line we are sufficiently equipped to cater to the specific needs of customers. We are capable of manufacture products customized to the specific design supplied or even develop prototypes and then the final product to suit special requirements with the same ease and efficient as we do our existing product range.

OUR WORKFORCE

Our manufacturing facility is supported by specialized engineers, technicians, technologist and a large motivated workforce, each committed to keep pace with the latest technologies advancements in their sphere of activity.

FUTURE VISION

Although within a short span of time, the company has become a trusted name in the electrical control & signaling device market, but our search for excellence does not end here. With our technical expertise, innovative spirit and commitment to absolutely quality, the never changing target remains production of increasingly better products and services.
