

QUALITY CONTROL

In keeping with our stance on quality and in compliance with the regulations, we have developed a comprehensive system of production and in process monitoring to ensure quality control is maintained. Quality Assurance is our priority with principles of GMP ensuring Quality, Safety and Efficacy. A highly experienced quality control team constantly monitors the procedures to guarantee quality for the final product at every step of the production.

In the product analysis a high degree of Accuracy, Standardization and Quality Evaluation of the extracts are being carried out before the release of the product to customers. Our quality control department is well equipped with analytical instruments like HPLC, GC, UV-VIS Spectrophotometer and so on. The final processing and packing are according to GMP standards.
