S.No.	Characteristics attributes	Characteristics description / specification		
1	Process	Individually Quick Frozen Muskmelon Balls		
2	Origin	India		
3	Treatment	No Food Additives used.		
4	Physical Parameter			
	Product Size	Free flowing Balls of sizes 22 MM (After storing at -18°C for more than 3 weeks, Balls may assume a shape of a block, which can be loosened by shaking / banging the cartons gently, twice or thrice). The Balls are made of semi ripe fruit, spherically scoped. Since the fruits are oblong not all Balls will be completely uniform in shape/size. However, about 70 % of balls are spherical shape & 30 % will be of half shape due to the geometry of the fruit.		
	22 MM sphere	70 % Of whole balls		
		<25 % Of 60-70% balls		
		5 % of half balls		
	Foreign Matter	Tolerance 10 Kg		
		Value	Tolerance
