*Year of  
Establishment  
2008*

Shivam Controls Systems has been in the business since 2008, manufacturing and supplying various automation machines across the country. Our product portfolio includes various machinery like batching systems, placer machines, bagging, batching & automation. Drum filling machines, electrical control panels and conveyor systems.

Being a very tech-savvy company, we have incorporated the latest technology in the machinery that we manufacture. This up-gradation is the result of continuous in-house research that goes on every day at our plant in Vadodara in Gujarat.

This has enabled the quality deliverance of products that have satisfied customers spreading our name far and wide. Their continual feedback is another reason why we have been able to reach this far. We have incorporated every single piece of information by them to upgrade to where we are today.

Complying with the standards of the industry is also another reason for the consistent quality that we have been supplying to them. We strictly adhere to the norms and regulations of the land. There is no place that our patrons will not be satisfied with us.

Apart from the quality and understanding of customer needs, our business management and ethics have carved a niche for us in the industry as one of the most reputable companies in India. Under the guidance and deliverance of our Director, Mr. Jatin Patel, we hope to have many more years in the industry,
