BAMBOO FACTS

It is a natural cellulosic fibre, can naturally degrade in soil, pollution-free to environment after decomposing, so it is a kind of natural, green and environmental protection type textile raw material.

This fabric has good hygroscopicity, moisture liberation and gas permeability; feeling soft, good drapability, easy to tint age, dye beautiful in color, has natural antibiotic, bacteriostatic finish and ultraviolet resistant functions.

Moisture Wicking- bamboo fabric absorbs moisture from your skin, keeping you drier and fresher and odour free.

Antibacterial - Bacteria doesn't live well in this fabric. So, it doesn't get smelly even after several days, unlike synthetic fabrics.

UV Protection - Arguably it cuts out 97.5% of harmful UV rays, so perfect for when you go for holiday/travelling in the sunny weather.

Super Soft - Bamboo is to cotton what cashmere is to wool, the softness of the fabric makes it fall perfectly on the skin and with no irritation and a soft light feel

Sensitive - For sensitive or allergy prone skin, bamboo is perfect. It's also anti-fungal. Specially for people with sensitive or easily irritable skin.

Thermo-control – Bamboo fabric is made up of hollow microfiber (like wool), yet it is also breathable. This quality of the unique fabric makes it warm in winters and cool in summer. Hence ideal in all temperatures.

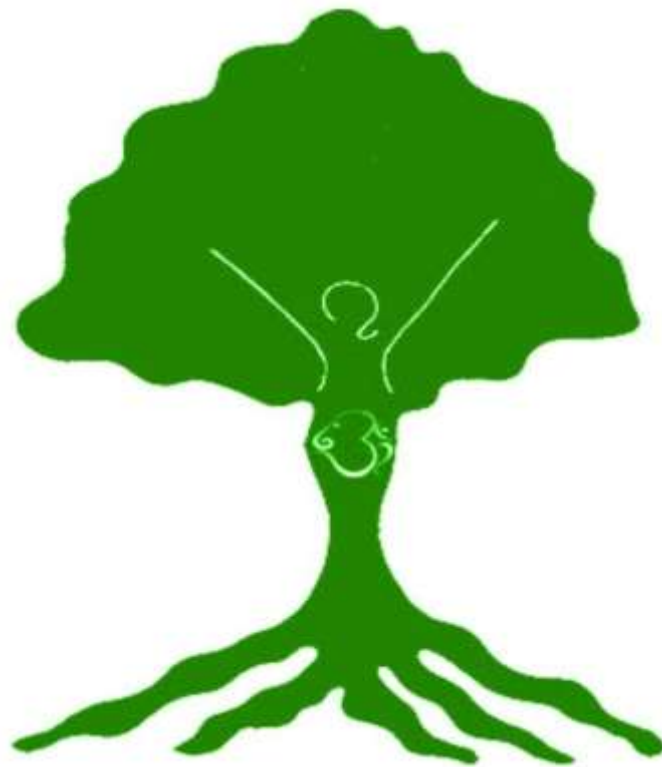

Anti-static – Another interesting fact about Bamboo fabric, it sits very well next to your skin, not clinging to it.

ORGANIC CLOTHES – FOR YOU FOR YOUR PLANET

Organic cotton does not involve the use of chemicals, it causes fewer allergies. Organic cotton apparel also reduces respiratory problems and smells pleasant.

Organic cotton is eco-friendly as it reduces pollution of ground water, prevents soil erosion and promotes biodiversity. It also helps to minimize the greenhouse effect and global warming through its ability to trap carbon in the soil.

Do your bit for your environment, choose quality over quantity. Healthier life for you.... healthier life for the planet.
