GRAPHITE POWDER (50-55-200)

Business Type : Manufacturer, Exporter,
Supplier, Retailer

The company has emerged as a highly reliable Manufacturer, Exporter & Supplier of Graphite Powder (50-55-200). The Graphite Powder (50-55-200) is popularly used in die casting foundries and paints manufacturing industries.

The Graphite Powder (50-55-200) enhances the shine of the finished products and it is known for helping in the easy release of the casting as well.

GRAPHITE POWDER (S-6)

Business Type : Manufacturer, Exporter,
Supplier, Retailer

Some of the key users of the Graphite Powder (S-6) are the foundries and paint manufacturers, with the powder being used for coating in molds as well. The company is a highly distinguished Manufacturer, Exporter & Supplier of Graphite Powder (S-6), which has a fixed carbon content of 60-65%.

The fineness measure of the Graphite Powder (S-6) can be specified as 200 ASTM mesh passing 90% min.

About the Market The graphite based products is considered to be the high tech product and in India much competition is not felt. Recently the company has given advertisement in the foundry magazine and responses from the market are encouraging. Many of enquires are already converted into business and others are in trial stage. Seeing the responses, company has decided to continue the advertisement for one complete year. It has also become the gold member in Indian Yellowpages who is one of the best web marketing promoters. In recent future company will float its web site with enquiry generation facility. It has also become free member in many web marketing agencies. To promote the products, company is thinking to introduce CDs, product catalogues and advertisement in other technical journal which will be eye catching for the buyers. As such the availability of graphite minerals is less in India as compared to its requirement and it is a great plus point for the company.
