

J. R. Engravers

Machine Tool Stampings • Male Female Stamping Moulds • Logo Marking Stamps
Steel Engraving Punch • Marking Wheels • Automatic Numerator Wheels
Steel Stamps • Automobile Moulds • Engineering Moulds • Electrodes for Reflector
Artistic Button Engraving Moulds • Casting & Forging Moulds
Numerator Wheels Moulds • Reflector Moulds

J. R. Engravers is a Ghaziabad (Uttar Pradesh) based organization, established in the year of 1995. In the state, the company rejoices an unrivalled reputation for its sheer commitment towards quality and client-centric policies.

Our Team

We are supported by determined and self-motivated personnel. Our team members understand the exact requirements of the clients and put best of their ability in order to achieve their expectations in the most efficient manner. Further, we have managers, supervisors and other clerical staff that collectively ensure smooth execution of entire business operations.

Manufacturing Unit

With a purpose to streamline entire production process, we have developed a sound manufacturing unit. The unit has been provided with advanced machinery and other amenities that make precision designing of products at great speed possible. With our production unit, we are able to take responsibility of bulk targets.

Why Us?

J. R. Engravers is a prominent Manufacturer, Supplier and Exporter, operating from Ghaziabad (Uttar Pradesh).

A huge range of accurately designed products

Backed by a team of dedicated personnel

Sound manufacturing unit

Widely established distribution channel

Ethical business operations

Our Products

MACHINE TOOL STAMPINGS

Wanting to give the powerful machine press exceptional support? Don't fret if these Machine Tool Stampings are present in the toolbox. These Machine Tool Stampings are required by machine presses in order to alter the shape and structure. We offer the most progressive stamping tools, combinations tools, two-pillar die set tools, and other allied accessories suiting different types of press tools. Also, we a wide range of press tools can be purchased from us, which includes dies, punches, etc.

Why Our Machine Tool Stampings?

- Precision design
- Allow proper shape and structure to be formed
- Pocket-friendly

MALE FEMALE STAMPING MOULDS

More than 2,200 designs of Male Female Stamping Moulds can be purchased from us. Such a wide selection of Male Female Stamping Moulds is required in diverse types of works. We offer Customized Male Female Stamping Moulds for leading corporate houses such as LG, Onida Bajaj Tempo, Philips, Cummins and Kirloskar, and the like.

Used In Manufacturing

- Automotive components
- Machinery

Our Products

LOGO MARKING STAMPS

Trust has been imposed on the quality of these Logo Marking Stamps by several of our patrons. Produced from a large scale calligraphy drawing to capture every tiny detail of any Logo, these Logo Marking Stamps are heat treated. High wear resistance and lasting precision to ensure the longest life of stamp mark are guaranteed by Logo Marking Stamps that we provide.

Highlights

- Scientifically heat treated
- Long stamp life

STEEL ENGRAVING PUNCH

Get from us Lightweight Steel Engraving Punch has excellent micro finish. Available in common fractional sizes, we can also cater to the specific requirements of clients while designing these Steel Engraving Punches. We have become a respected name to get world-class Steel Engraving Punch that complies with set industrial norms.

Known For

- Precision design
- High-grade steel used

Our Products

MARKING WHEELS

The best of metal and allied materials is used for making these Marking Wheels. Available in diverse specifications, these Marking Wheels are manufactured in confirmation to the set industrial standards. We are among the respected names to give clients unmatched Marking Wheels at the market leading rates.

Highlights

- Heavy duty
- Resilience

AUTOMATIC NUMERATOR WHEELS

Available in automated form, these Automatic Numerator Wheels are suitable for M/C USE or by hand and hammer. A Numerator, having 6 Automatic Numerator Wheels, with a special design ensures that figures advance one-at-a-time accurately and automatically. We have become a respected name in offering first-class Automatic Numerator Wheels.

Highlights

- Precision design
- High impact resistance

Our Products

STEEL STAMPS

Excellent steel is used for making these Steel Stamps that enables them to have high resistance to both corrosion and steel. Available in diverse specifications, these Steel Stamps can be designed as per the specific requirements of clients. We have become a reputed Manufacturer, Supplier and Exporter of Steel Stamps. Available in diverse finishes, these Steel Stamps are used in Furniture, Pump Parts, Automobiles, etc.

Known For

- Corrosion resistance
- Free from any stains

AUTOMOBILE MOULDS

The Automobile Moulds are brilliant for the production of the automobile equipment and they are made with the help of all kinds of engineering polymers. As a Manufacturer, Exporter & Supplier of Automobile Moulds, we use nylon, acrylic and ABS among other materials for the production. These Automobile Moulds guarantee production efficiency and the design and durability is top-notch.

Our Products

ENGINEERING MOULDS

The Engineering Moulds are ideal for the mould engineering jobs and the finishing provided by them is appreciated across the globe. The company is known as a reputed Manufacturer, Exporter & Supplier of Engineering Moulds, which can have single or multiple cavities. The Engineering Moulds can be availed in round, square or hexagonal shapes and can be used for boring, milling and drilling operations.

ELECTRODES FOR REFLECTOR

The company has carved a niche for itself as a Manufacturer, Exporter & Supplier of Electrodes for Reflector. With our Electrodes for Reflector, the user has light adjustment options so that a particular part or component can be focused on through maximum illumination. The reflectors clamp of the Electrodes for Reflector is useful for working with microscopes, with the black painted metal arc and the pin ensuring smooth movement.

Our Products

ARTISTIC BUTTON ENGRAVING MOULDS

The Artistic Button Engraving Moulds can provide high productivity levels while working for long periods of time. The moulds are resistant to heat and we are a leading Manufacturer, Exporter & Supplier of Artistic Button Engraving Moulds. Providing finished buttons with great patterns, the Artistic Button Engraving Moulds come in a wide variety of sizes.

CASTING & FORGING MOULDS

The Casting & Forging Moulds are a well-engineered range of stamps that are known for providing excellent engraving results at the time. As a Manufacturer, Exporter & Supplier of Casting & Forging Moulds, we ensure that proper die casting methods are followed so as to ensure the perfect shape of the moulds. The Casting & Forging Moulds are available in single and multi-cavity constructions.

Our Products

NUMERATOR WHEELS MOULDS

The Numerator Wheels Moulds come with an automatic or manual advance option, and they are highly suitable for machine usage as well as the hand-hammer usage. Having as many as six wheels along with a special design, the Numerator Wheels Moulds can ensure the one-by-one automatic advancement of the figures with accurate results. We are a highly distinguished Manufacturer, Exporter & Supplier of Numerator Wheels Moulds.

Our Products

REFLECTOR MOULDS

The company has stood tall as a Manufacturer, Exporter & Supplier of Reflector Moulds. These Reflector Moulds guarantee excellent engraving results even after prolonged and continuous usage. There is absolutely no impact of the industrial rigors as well as water, chemicals and acids on the Reflector Moulds, which are recognized and extensively used by small scale industries.
