Asthma Medicine

Demega formulations India is involved in offering excellent quality medicines to our most valued clients. Asthma is a disease affecting the airways that carry air to and from your lungs. People who suffer from this chronic condition (long-lasting or recurrent) are said to be asthmatic. As inflammation causes the airways to become narrower, less air can pass through them, both to and from the lungs. Asthmatics usually experience these symptoms most frequently during the night and the early morning.
