SURGITECH is an Indian orthopaedic implant manufacturing company with a legacy of precision engineering and clinical reliability. Established in 1994, we have grown into a medium-scale manufacturing unit dedicated to producing high-quality orthopaedic implants for global markets.

Our manufacturing facility operates with comprehensive quality control systems and is supported by a skilled workforce of around 25 trained professionals. Every stage of production—from raw material selection to final inspection—is closely monitored to ensure consistency, safety and performance.

We manufacture a complete range of orthopaedic implants, including plates and screws, using Stainless Steel 316L and Titanium Grade V (Ti-6Al-4V), meeting international medical standards. Our products are known for their strength, biocompatibility, and precision finish, making them suitable for diverse clinical applications.

At SURGITECH, we remain committed to continuous improvement, ethical manufacturing practices, and supporting better patient outcomes through reliable orthopaedic solutions.
