ABOUT US

Established in the year 1995, Pragati Associates is one of the reputed organizations engaged as an Exporter, Importer and Supplier of Chemicals, Ferro Alloys and Ceramic Raw Materials. The CEO Mr. Kamal Jain has taken the company to new heights, and we are constantly climbing the ladders of success under his valuable headship. Our company has made its mark in the international markets of chemicals in the last 15 years. The company is catering to many leading national and multinational organizations.

Quality Assurance

We are guided by a set of stringent quality control policies adopted by our management. According to the aforesaid policy, our products are tested on different parameters to ensure their purity and performance. We never compromise on quality and that's the major reason why we are always a step ahead of our competitors.

OUR PRODUCTS

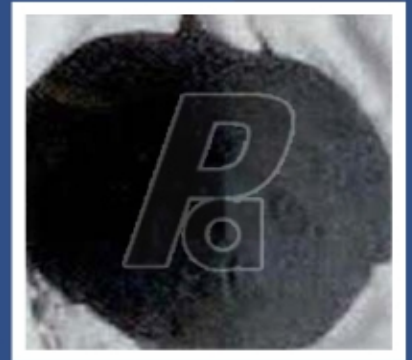

Rutile Sand

We are importer of Rutile Sand and Leucoxene Sand, having best quality, which are mostly use in Welding Electrode Industries.

Our original bulk packing is one of the assurances of quality.

Rutile is basic raw material used in Electrode Industries. We care of our customers to make good products through our Rutile having following TiO₂ content :

- TiO₂ : 92%-96%
- Packing : 40 kg., 50Kg, 1 M.T., 1750 kg.

Titanium Dioxide

Titanium Dioxide is White Pigment Powder, which comes in two grades known as Anatase and Rutile Grade. We are renowned amidst the reliable suppliers of Titanium Dioxide.

Titanium Dioxide is mainly used for Coating, Plastic, PVC, Paint, Master Batch, Pharma & Paper Industries.

Cellulose Powder

Cellulose Powder is a white, odorless powder made by Cotton Waste ,Paper Pulp and wood Pulp. It is processed properly and the impurities are removed through proper washing. Our company is enlisted as one amidst the reliable Manufacturers & Suppliers of Cellulose Powder.

Our Cellulose Powder is known for attributes like free of chlorides and low ash content with purified grade. We sell 200 M.T. Cellulose Powder in a year.

Sodium Alginate

The chemical compound Sodium Alginate is the Sodium Salt of Alginic Acid.

Sodium Alginate is used as a Binder, Dye Printing, Electrode Industries and also to increase viscosity in Foods and Cold Drinks. We specialize in supplying of different grades of Sodium Alginate.

OUR PRODUCTS

Quartz Deposit

We are associates with Mines at Sirohi (Rajasthan) having good quality of Minerals like Quartz Deposit.

We have our own process house, where we grind the product as per customers need.

Quartz Deposit : 99.5% Silica

Sodium Carboxymethyl Cellulose Powder

Sodium CMC is as Sodium Carboxy Methial Cellulose Powder which is used as a Thinker, Binder and Additive in many Industries.

We supply different grades of Sodium C.M.C. for different viscosity. Some of them are as follows:

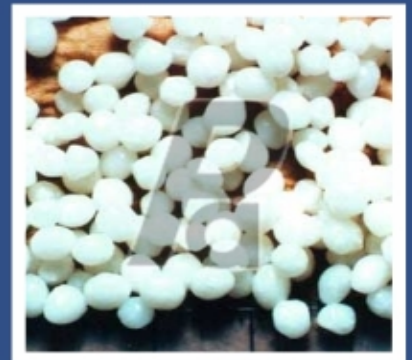

- M.V.
- H.V.
- MVP
- HVP
- DVP
- As per customers' requirement

Calcium Alginate

Calcium Alginate is White Powder having large strength of viscosity.

Calcium Alginate is widely used in Foods as a Stabilizer, Thickener and Emulsifier, in Welding Electrodes Industries and Pharma Industries. We specialize in supplying of different grades of Calcium Alginate.

Feldspar Deposit

We are associates with Mines at Sirohi (Rajasthan) having good quality Feldspar Deposit.

We have our own process house, where we grind the product as per customers need.

Feldspar : Both Potash and Soda

OUR PRODUCTS

Calcite Powder

We are associates with Mines at Sirohi (Rajasthan) having good quality of Minerals like Calcite Powder (Deposit).

We have our own process house, where we grind the product as per customers need.

Calcite : CaCO_3 96 % min to 98 %

Ferro Manganese Powder

Trading house of Ferro Manganese Powder providing the following grades:

- High Carbon
- Medium Carbon
- Low Carbon
- Extra Low Carbon

Uses :

- Steel Industries
- Welding Electrodes Industries

Manganese Metal Powder

We supply purified grade Manganese Metal Powder having 99.5% min. Manganese content.

Iron Powder

We supply different grades of Iron Powder that are used for different purpose. We have following grades:

ELECTROLYTIC IRON POWDER :

| | |
|----------------------|---------------|
| Fe Iron Content | 99.5% Minimum |
| C Carbon Content | 0.03% Max. |
| S Sulphur Content | 0.03% Max. |
| P Phosphorus Content | 0.02% Max |
| Mn Manganese Content | Traces. |

OUR PRODUCTS

Fluorspar Lumps

The Fluorspar Lumps are available in various sizes ranging from 10-80 mm. These Fluorspar Lumps, offered by the company, contain up to 95% of CaF_2 . The company is a highly trusted Exporter, Importer and Supplier of Fluorspar Lumps and the procurement and marketing is handled by experts. The company ensures the timely and safe delivery of the Fluorspar Lumps at the best prices.

Fluorspar Powder

Containing up to 95% CaF_2 , the Fluorspar Powder is used for ceramic and building materials production. The company has acquired a position of prominence as an Exporter, Importer and Supplier of Fluorspar Powder. The Fluorspar Powder has a density of 3.18 g/cm^3 and a melting point of 1423°C . The Fluorspar Powder is procured from trusted sources and the delivery is timely and safe.

Hydroxyethyl Cellulose Powder

We supply purified grade Manganese Metal Powder having 99.5% min. Manganese content.

Ilmenite Sand

Avail a pure and properly packaged range of Ilmenite Sand from us! As an Exporter, Importer and Supplier of Ilmenite Sand, we offer various grades with differing quantities of TiO_2 like 50-51%, 53-54% and 56%. The Ilmenite Sand is used for welding rods and pigments and contains a maximum of 1% of moisture. The Ilmenite Sand is sourced from the best entities in the business, with the pricing being reasonable and the delivery being timely.

OUR PRODUCTS

Polyaluminium Chloride Powder

We are supplier of Polyaluminium Chloride Powder form which is highly used for water treatment in so many industries and for water softening in soap and detergent industries.

Silico Manganese Powder

We offer all grades of Silico Manganese in powder form with mesh of 60-100 mesh or as per customer need. We are a highly distinguished Exporter, Importer and Supplier of Silico Manganese Powder. The Silico Manganese Powder is sourced from the best vendors and the delivery is timely at all times.

Stabilized Ferro Silicon

We are supplier of Stabilized Ferro Silicon having less gases and impurities. It is mostly used in welding electrode, casting and related metallurgy industries.

Grades

- Si- 40-45%,
- C- 0.5% S&P- .03%

Welding Electrode Flux

We are a reputed Importer, Exporter, and Trader from Indore (Madhya Pradesh), offering Flux for Welding Electrode. We provide all grades of Welding Electrode Flux to manufacturing of welding electrodes in advice of highly experienced consultants to match the quality of national and international market.

We are providing following grades :

- Rutile Base
- Ilmenite Base
- SS Electrodes and for all special Electrodes or as per customer requirement.
