# ABOUT US

## **Krupalu Rice Industries Pvt. Ltd.**

We are one of the major processors/exporters of Indian Non-Basmati Rice, which produces around 90,000 Mt of rice per year. Our unit is located at Panikoili, in Jajpur District of Odisha and has two numbers of in house par-boiled milling capacities of 12 MTPH. We are having our own storage capacity of around 90,000Mts in the shape of Silos & godowns. We have got a good team of highly skilled & experienced personnel heading different specific areas of our unit.

Started in the year 2005 from a small paddy trading firm of Shri Anirudha Dash, under the name of Krupalu Agency.

This is his vision and strong determination which has brought our company to this level as it is today and it would surely establish a mark for itself in the rice industry in near future. This year Mr. Trilochan Dash, the elder son of the founder joined the family business after completion of his management studies and contributed towards strategic planning for development & growth. We have

converted our paddy trading business into a Paddy processing unit of 6 MTPH capacity and started operation in the name & style of Krupalu Rice Industries. The business accelerated to a new height and started catering to Odisha market and other neighboring states also. The demand for our product has grown up dramatically year on year. In the year 2009, to meet up with the demand for our rice, we have started setting up another Paddy processing unit of 6MTPH capacity adjacent to the previous unit under the same group. In the year 2013, Mr. Ashirbad Dash, youngest son of the founder also joined business after his management studies. The business has grown up to a new height with the participation of both the sons. Since then, the company is moving towards achieving its objective and reaching new heights through its dedicated work force, upgraded machineries supplied by leading machine manufacturing companies and under the guidance & management of its founder.

## **Harekrishna Rice Processing & Exports**

A fully automated rice mill equipped with imported machineries & having a capacity of 12MTPH established in the year 2016 under "Krupalu Group". After having control over quality parameters, demand for our product in the market has grown up. By this time, our existing market has grown from Odisha to Andhra Pradesh, Tamilnadu, Kerala, West Bengal & other states. At present we cater to our valued clients all over India and supplying to other countries like West Africa, Vietnam, Srilanka, Bangladesh.
