Single Stop for all Steel Fabrication & Metal Work

Stainless Steel Storage Tanks

Electrical Control Panel

Industrial Lockers

Belt Conveyor System

Industrial Shed Structure

Stainless Steel Table

Heating Coils

Industrial Racks

Material Handling Trolleys

Stainless Steel Pallets

Mild Steel Pallets

Milk Storage Tanks

Profile Bending

Stainless Steel Storage Tanks

Our organization is engaged in providing durable Stainless Steel Storage Tanks that are manufactured using high-grade stainless steel. These Stainless Steel Storage Tanks are widely demanded in industries like chemical, alcohol, petroleum, etc., for the storage purposes. Our Stainless Steel Storage Tanks are appreciated for their durability, high strength, corrosion resistance, chemical resistance, etc.

Stainless Steel Pallets

We offer a wide range of stainless steel pallets perfectly suitable for material handling in pharmaceutical plants. Fabricated using stainless steel (SS 304), these steel pallets are provided with rectangular and square hollow pipes. Our stainless steel pallets are known for corrosion resistance and low maintenance.

Specifics:

Standard Size: 1200 mm. (L) X 1000 mm. (W) X 100 mm. (H) from S.S. 304 tubular pipes

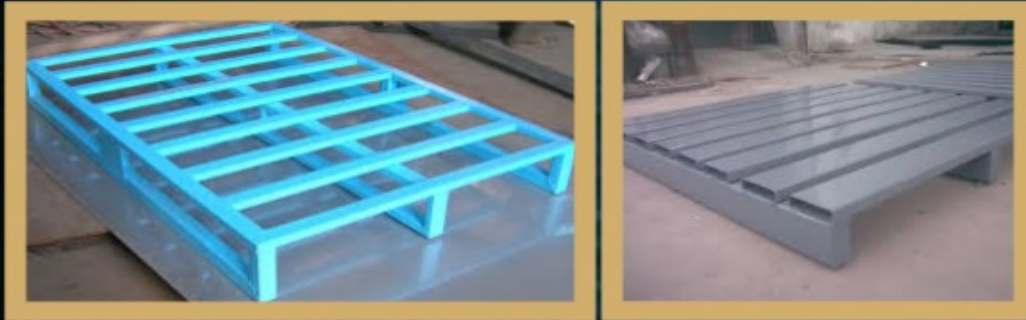

Customization: Available

Electrical Control Panel

Electrical Control Panel that we offer is highly efficient and easy-to-operate. Our Electrical Control Panel is widely used in electrical and engineering industries for industrial process control applications. We provide Electrical Control Panel with electrical assy for voltage exceeding 1000 volts. Further, our Electrical Control Panel requires very low maintenance.

Mild Steel Pallets

MS Pallets are especially designed for easy & safe routing of materials.

Features

- Available in standard and customised sizes.
- Safe Load Bearing Capacity.
- Colour selection from wide range.

Application

- All Industries including Food & Pharma Industries.
- Advantages
- Less investment more perfection.
- Long Life.
- Environment Friendly.
- Safe and versatile Design

Why M S Pallets Are Preferred?

Safety is the concern for anyone who comes in contact with wooden pallets. On a daily basis, warehouse workers are injured handling heavy pallets by hand, are attacked by rogue nails or splinters when pallets are used for displays on superstore floors, and drivers end up in accidents when slick pallets slide off trucks into traffic which lead to huge value settlement claims.

Along with the safety issues there are known cases when disinfectants or other substances used to treat wooden pallets leached into food and beverage products being carried on the pallets, causing consumers to become ill. Many a times, in food, soft drink, Milk & Pharma companies have to recall products because a disinfectant sprayed onto the pallets contaminated the main product itself.

Industrial Lockers

Industrial Lockers are widely installed in different industries in order to keep the employee's item safe and secure. We are offering a wide range of Industrial Lockers manufactured using high-grade steel and appreciated for robust construction, superior finish and corrosion resistance. Our Industrial Lockers are available in stylish designs and features ample space for storing good amount of articles.

Milk Storage Tanks

The tank is widely used in various dairy plant industries for cooling and storing milk in bulk. The tank is made up of stainless steel to store milk in hygienic condition. Clients can avail the tank from us in various dimensions and sizes.

Features:

- Leak proof
- Provide large storage
- Anti corrosive

Specifications:

- Material : Stainless Steel
- Capacity : 1000 litre-30000 litre

S.S. Working Table

Specifications

Stainless steel top work surface

Work table surface has curved edges for safety.

Available in different sizes & customization also available.

Belt Conveyor System

Belt Conveyor System is used for transporting different heavy or light weight products from one place to another. Our Belt Conveyor System is easy-to-operate and known for its sturdy construction, smooth operation and durability. Our clients can avail our Belt Conveyor System in required specifications. Belt Conveyor System is widely used in industries like chemicals, food, pharmaceuticals, etc.

Industrial Shed Structure

To serve the diverse requirements of the clients, we are engaged in offering a qualitative range of Industrial Shed Structure. Made from high quality materials, our Industrial Shed Structure is acknowledged for attributes like durability, optimum strength, weather resistance, superior quality, etc. Known for its high level of performance, our Industrial Shed Structure is widely used in different industrial applications.

Stainless Steel Table

Stainless Steel Table that we offer is made using high-grade stainless steel and acknowledged for durability, high strength, superior finish, sturdy construction, corrosion resistance, weather resistance, etc. Our Stainless Steel Table is an ideal choice for restaurants, coffee shops, canteens, etc. Moreover, our Stainless Steel Table is available in different sizes.

Heating Coils

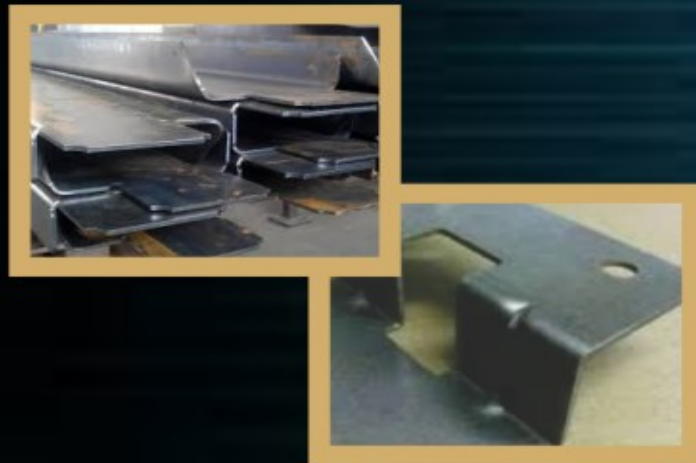

Stainless Steel Table that we offer is made using high-grade stainless steel and acknowledged for durability, high strength, superior finish, sturdy construction, corrosion resistance, weather resistance, etc. Our Stainless Steel Table is an ideal choice for restaurants, coffee shops, canteens, etc. Moreover, our Stainless Steel Table is available in different sizes.

Industrial Racks

Industrial Racks are widely used for storing the items in an organized manner inside a warehouse or factory. These Industrial Racks are made from superior quality steel & other metals and appreciated for durability, high strength, high loading capacity and corrosion resistance. These Industrial Racks are available in distinct sizes and specifications to suit the requirements of the clients.

Profile Bending

Different type of profile bending can be done depend upon the requirements.

Specifications

Material: - Mild Steel.

Size: - 3000L 8 * 6t mm

Specifications

Material: - Mild Steel.

Size: - 3050l * 8t mm.

Material : - Stainless Steel.

Size: - 3050l * 6t mm.

Material Handling Trolleys

Material Handling Trolleys are widely used in warehouses and similar other places for transporting heavy items from one place to another. These Material Handling Trolleys are constructed using high-grade stainless steel for heavy production industry sectors including in sugar industry, automotive parts and others. These Material Handling Trolleys provide suitable material handling support including in hanging and transferring of material. These durable Material Handling Trolleys are easy-to-handle, requires least maintenance and available with powder coating finish offering resistance to corrosion.
