We are the exporter of Coir pith and the Coir pith is also known as Coco peat. We offer you the best quality Coir pith blocks and bricks at a reasonable rate.

Coir pith is a multipurpose growing medium. Hydroponic growers can use Coir pith as a natural soilless growing medium to produce high yielding quality vegetables and cut flowers. The Coir pith blocks are free from weeds and pathogens and are within safe EC and pH standards. Usage of coir pith blocks ensures high oxygen levels and thus good drainage properties. We offer best quality COIR PITH in a competitive price. It is purely a natural organic product and it is environmentally acceptable from its sources through processing to end use. One kg of compressed Coir pith will expand to 15 liters of moist coir pith. Low EC Coir pith is used for Agriculture.

COMMON USES OF COIR PITH INCLUDE:

- »» Coir pith Blocks are used as a Soil Conditioner, Surface Mulch/ Rooting
- »» Medium and Desiccant. Composted Coirpith is an excellent organic manure for Indoor plants as well as for Horticulture Crops.
- »» Mixed with sand, compost and fertilizer to make good quality potting soil. Coir pith generally has an acidity in the range of pH – 5.5 to 6.5.
- »» As substrate for growing mushrooms, which thrive on the cellulose. Coir pith has high cellulose and lignin content.
- »» Low Ec Coir peat is used as a growing media.

PACKAGING : Our products are packed according to the customized packing solution. Our packages are superior, secured and water proof. We ensure distribution order in time as we have a dynamic logistic system that empowers to reach patrons within the promised time. Our coir Pith blocks are manufactured by using best quality raw material.
