Tribulus Side Effects & Safety :

Tribulus supplements are possibly safe for most people when taken by mouth for a short period of time. They have been used safely in research studies lasting up to 8 weeks. The long-term safety of tribulus is unknown.

Eat the spine-covered fruit of tribulus is likely unsafe. There has been a report of a serious lung problem linked to eating the fruit.

Special Precautions & Warnings :

**Pregnancy and breast-feeding :** Taking tribulus during pregnancy is possibly unsafe. Animal research suggests that tribulus might harm fetal development. Not enough is known about the safety of using tribulus during breast-feeding. It's best not to use tribulus if you are pregnant or nursing.

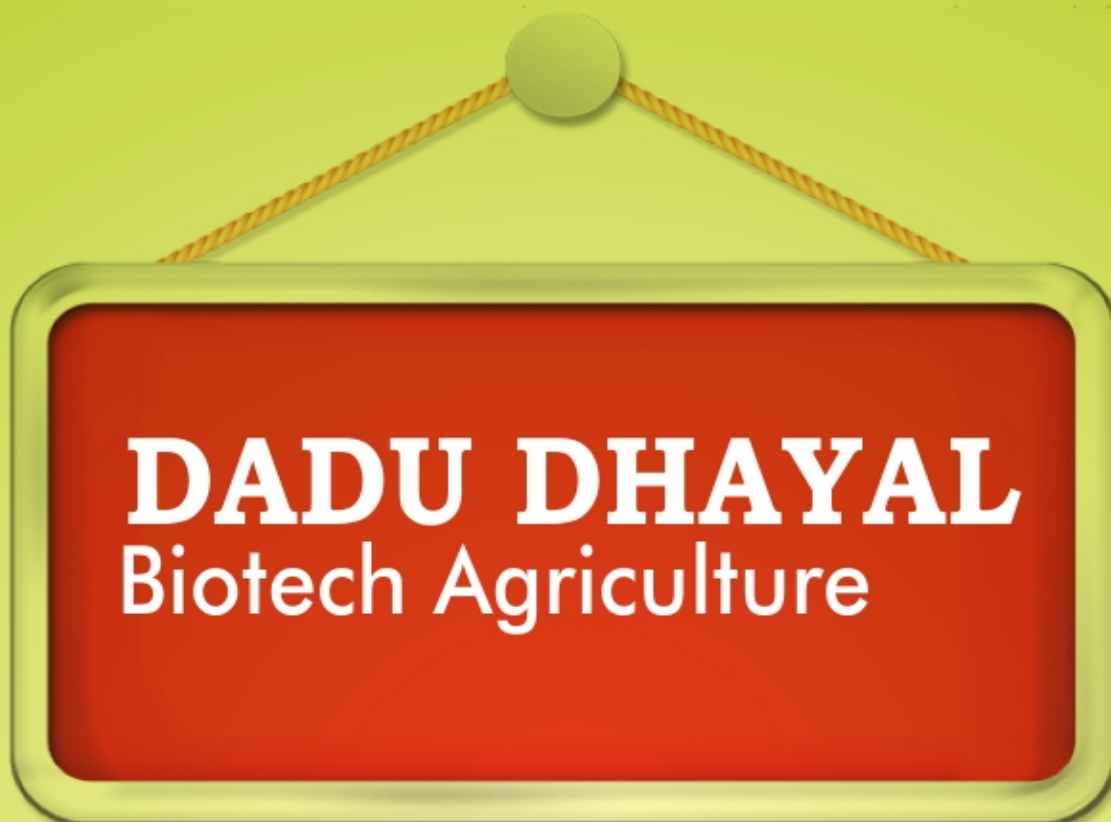

**Prostate problems or prostate cancer :** There is a concern that tribulus might make prostate conditions such as benign prostate hypertrophy (BPH) or prostate cancer worse. Developing research suggests that tribulus can increase prostate weight.

**Diabetes.** Tribulus might decrease blood sugar levels. Dose of diabetes medications might need to be adjusted by your healthcare provider.

**Surgery :** Tribulus might affect blood sugar levels. This might interfere with blood sugar control during and after surgery. Stop using tribulus at least 2 weeks before a scheduled surgery.
