

Mehul Dye Chem Industries

Mehul Dye-Chem Industries was established in the year 1988. Since then our company has been successfully winning the hearts of thousands of worldwide clients by providing them superior quality dyes & pigments like basic dyes, solvent dyes, acid dyes, fast dyes etc. We have carved a niche as one of the prominent Fast Dyes manufacturers in India. Mr. Nikunj Hirani is the CEO of our company, who possesses profound experience in this field. We also offer wholesale acid dyes at various profitable deals, which are highly admired by all our honored clients.

Quality Orientation

We understand the requirements of our quality conscious clients and accordingly manufacture our best range of products. We never compromise with the quality of our products and always strive to deliver superior quality products to our clients.

Standardized Products

We have adequate knowledge of the contemporary market demands, which helps us in manufacturing products that conforms to various Indian and international quality standards. We also design our products as per the requirement of our honored clients.

Clientele

We have earned reputation all over the world due to the manufacturing of products that match the expectations of our clients. We have a worldwide client base and believe in total customer satisfaction.

PRODUCTS

Acid Black 210

Acid Black 210 dye is the prime manufacturing product of Mehul Dye Chem. Industries, which we are offering in wide range of chemical composition. Based on the effective chemical composition of these Acid Black 210 dyes, we are stated as the prime manufacturer and exporter of Acid Black 210 dyes.

Acid Orange

We are the most trusted manufacturer and exporter of Acid Orange Dyes, which are of Monoaza, chemical class. Well-chemical compositions, of these Acid Orange dyes make them applicable for various industrial applications.

Acid Scarlet 3R

Mehul Dye Chem. Industries is the most reliable manufacturer and exporter of Acid Scarlet 3R dyes, which are hugely asked by industries. Made after the accurate mixing of various chemicals, our offered Acid Scarlet 3R dyes are applicable for various industrial applications.

Solvent Orange 14

For the apt functioning in various industrial applications, clients trusted the quality of our offered Solvent Orange 14 solvent dyes. These dyes are chemically tested, which assure non-harmful effect on the user.

Solvent Red 24

Mehul Dye Chem. Industries is the leading pioneers of chemicals, offering a wide range of Solvent Red 24. Our offered Solvent Red 24 is hugely demanded in global markets for their accurate chemical compositions.

Solvent Yellow 2

Solvent Yellow 2 belongs from the Disazo chemical class and comes in reddish yellow hue. Being the most trusted manufacturer and exporter of Solvent Yellow 2, we manufacture Solvent Yellow 2 with the help of experts.

Basic Auramine O

Mehul Dye Chem. Industries is the one name, which is look after for the manufacturing and exporting of Basic Auramine O. Our manufactured Basic Auramine O is known for its accurate chemical specifications, which makes it worthy to apply in varied industrial processes.

PRODUCTS

Basic Crysodine Y

Basic Crysodine Y is one of the highly recommended products of our offered range of Basic Crysodine Y. Made through the various compositions of chemicals; our offered Basic Crysodine Y is of assured quality and provides apt functioning.

Basic Crystal Violet

Basic Crystal Violet, which is manufactured by us, also reckoned in the markets by the name of Basic Violet 3. The accurate ratio of other chemicals help in smoothens up the functioning of Basic Violet 3 in industrial applications.

Basic Magenta Powder

Basic Magenta Powder is rich in its chemical structure, which is made up of Triaryl methane series. Yellowish green in appearance, our manufactured Basic Magenta Powder is also known as Basic Violet 14.

Basic Malachite Green

Basic Malachite Green is the prime manufacturing product of Mehul Dye Chem. Industries, which is widely demanded by clients in huge quantity. Famous for their effective chemical properties, our manufactured Basic Malachite Green has sensationalized the markets with their presence.

Basic Methyl Violet

Basic Methyl Violet is one of the prime manufacturing products of our offered range. The huge popularity of Basic Methyl Violet has helped us to earn the acknowledgement in global markets.

Basic Rhodamine B

Basic Rhodamine B that is manufactured by us, demanded by clients, under the names of Rhodamine B and Basic Violet 10. The desired functioning of Basic Methyl Violet in many applications has proven its unique traits.

Victoria Blue B

Victoria Blue B, which is manufactured by us for that we are statured on top in the global markets as the prime manufacture and exporter of Victoria Blue B. the optimum quality and apt functioning of Victoria Blue B have based us to stand on top.

PRODUCTS

Fast Garnet GBC Base

Fast Garnet GBC Base is one of the prime manufacturing products of Mehul Dye Chem. Industries, available in a huge range. Assured quality and satisfactory performance of our manufactured Fast Garnet GBC Base have positioned us on top.

Fast Garnet GBC Base

Fast Scarlet RC Base is known in markets by many other names. We are glad to serve parallel to the global demand of our manufactured Fast Scarlet RC Base. Based on our satisfactory services, we have become the reliable manufacturer and exporter of Fast Scarlet RC Base.

Pigment Red 2

Mehul Dye Chem Industries is widely known in markets for the manufacturing of Pigment Fast Red, which is popularly known as F2R (Pigment Red 2). The assured quality of Pigment Fast Red F2R (Pigment Red 2) supports all industrial applications to smoothen up.

Pigment Red 3

Pigment Toluidine Red RN (Pigment Red 3) is manufactured the pioneers Mehul Dye Chem. Industries with utmost precision. We are pleased to serve against the demand of Pigment Red 3 in global markets.

Pigment Red 8

We have an untiring group of professionals and in depth technology that has helped us to become one of the most pioneering manufacturers of Pigment Red 8. Pigment red 8 is mostly used in water based paints, with blue shade for easily amalgamation.

Pigment Red 9

We are an iconic brand in the manufacturing of wide range of high quality Pigment Red 9. Our pigments are known as Arylide Reds in the market. This pigment doesn't have any significant toxicity if inhaled.

Pigment Red 23

We have achieved a staggering success in the manufacturing of Pigment Red 23. Widely in demand in the market, it is a bluish red commercial dye used as coloring agent in paints, inks, rubbers, plastics, papers and lacquers.

PRODUCTS

Pigment Red 31

We have a cutting edge over all our competitors in the manufacturing of Pigment Red 31. Our Pigment Red 31 prepared under safe conditions to assure purity and effective nature due to, which it is in wide demand in the markets. Our pigment red 31 is a coloring agent mostly used in paints, inks, rubbers, plastics, papers and lacquers.

Pigment Red 32

We have very swiftly emerged as one of the important players in the manufacturing of Pigment Red 32. Manufactured under safe conditions our premium range of Pigment Red 32 is widely used in various industries for several purposes.

Pigment Red 49 2

Avail from our wide range of high quality Pigment Red 49:2 that are used in many chemical applications and industries. Our range of Pigment Red 49: 2 are highly in demand in the market because of its quality features like high solubility, thick concentrated form.

Pigment Violet 23

We are enlisted among the prime Pigment Violet 23 manufacturers in India. Manufactured under safe conditions our pigment violet 23 is widely in demand in the market due to its useful features like high solubility and thick concentration. The Pigment Violet 23 is bright reddish to bluish violet pigment with high color strength and fastness to all properties with high dispersibility.

Pigment Orange 5

We are recognized as one of the trustworthy manufacturers and suppliers of high quality Pigment Orange 5. Pigment Fast Orange 5 has deep orange hue with high color fastness. Manufactured under safe conditions our pigment is highly recommended for Industrial Coatings and Decorative Coatings.

Pigment Orange 13

We supply and export high quality Pigment Orange 13 is extensively used in the industries like Textile, Paint, Printing ink, Plastics, Rubber, Soap, Cement, Color, etc. our range of Pigment Orange 13 is opaque and has a bluer tone.

Pigment Orange 34

We bring forth high performing Pigment Orange 34. It is basically used in textile printing and plastics. It is reddish yellow in color and acts as a water base ink.

PRODUCTS

Pigment Red 31

Mehul Dye Chem. Industries offers an array of Pigment Red, which is highly useful in various industrial applications. The optimum results of our manufactured Pigment Red have supported us to cater the best in the global markets.

Pigment Violet 23

We are enlisted among the prime Pigment Violet 23 manufacturers in India. Manufactured under safe conditions our pigment violet 23 is widely in demand in the market due to its useful features like high solubility and thick concentration. The Pigment Violet 23 is bright reddish to bluish violet pigment with high color strength and fastness to all properties with high dispersibility.

Pigment Orange 5

We are recognized as one of the trustworthy manufacturers and suppliers of high quality Pigment Orange 5. Pigment Fast Orange 5 has deep orange hue with high color fastness. Manufactured under safe conditions our pigment is highly recommended for Industrial Coatings and Decorative Coatings.

Pigment Orange 13

We supply and export high quality Pigment Orange 13 is extensively used in the industries like Textile, Paint, Printing ink, Plastics, Rubber, Soap, Cement, Color, etc. our range of Pigment Orange 13 is opaque and has a bluer tone.

Pigment Orange 34

We bring forth high performing Pigment Orange 34. It is basically used in textile printing and plastics. It is reddish yellow in color and acts as a water base ink.

Masterbatch

We are the well known manufacturer and supplier of Master Batches that are suitable for film blowing, wiredrawing and injection moulding. We can produce a series of color master batches from various colors. A series of master batch has been exported to overseas countries and gained appreciation for its high quality and optimum efficiency.

PRODUCTS

Vinyl Sulfone Dyes

We manufacture Vinyl Sulfone Dyes that are manufactured using superior raw material. Vinyl dyes are available in various colors as per the requirements of the clients. Our Vinyl sulfone dyes have numerous advantages like color fastness, brightness etc. and are available at nominal rates. Sulfone dyes are mainly used for dyeing cotton, linen, viscose rayon & cellulose component of polyester cellulose blends. Sulfone dyes gives optimum results in brightness, depth & fastness.

Hot Dyes

We offer Hot Dyes that are based upon multifunctional reactive chemistry. Hot dyes are fabricated for exhaust dyeing applications with improve abilities to achieve deep shades in the respect of environmental concerns. Hot dyes are available in varied colors as per the requirement of the client.

Bi-Functional Dyes

We produce bi functional dyes that are made from prime quality raw material. Our range of bi-functional reactive dyes produces high build up and enhanced compatibility in medium temperature applications. You can obtain bi functional dyes at reasonable prices from us.

Bi-Functional Dyes

We are counted among the prominent manufacturers and suppliers of Glycolic Acid in India. Glycolic Acid is the first member of Alfa Hydroxyl Acid family of carboxylic acid. Our Glycolic acid has unique properties, which makes it ideal for various consumer & industrial applications. A mixture of Glycolic Acid and formic acid is fast and effective for cleaning high pressure stainless steel steam generators.
