

M/S Dropco
Multilub Systems Pvt. Ltd.

M/S Dropco Multilub Systems Pvt. Ltd. is an ISO 9001:2008 Certified Unit. We are engaged in serving the industry with a gamut of high quality Centralized Centralised Lubrication System. Our array of products includes a wide range of Centralised Lubrication System and Oil Recirculation System. In addition to this, we are also capable of serving the industry with high quality Hand Operated Piston Pumps, Metering Injectors, and Barrel Pump. The company is registered with with NSIC, SSI, EITC, SAIL, TATA, DSP, BHEL, RCF, etc.

ABOUT US

M/S Dropco Multilub Systems Pvt. Ltd. is reckoned as one of the pioneers in the field of manufacturing, exporting and supplying Centralized Centralised Lubrication System. Established in the year 1995, the company is an ISO 9001:2008 certified unit and is even registered with NSIC, SSI, EITC, SAIL, TATA, DSP, BHEL, RCF, etc. Under the headship of Mr. J.L Gulati (Managing Director) and Mr. R.K. Gulati (Director) the company has achieved incredible growth.

Infrastructure

With an area of approximately 11000 sq feet, our manufacturing unit is equipped with all the necessary modern tools and machinery. We have two factories in the industrial area of Faridabad, Haryana; where we manufacture our product range with extreme precision using quality methods.

Quality Policy

Being a quality conscious firm, we believe in total quality management. We use high quality raw material such as M.S., C.I., Brass, Aluminum, Zinc, Plastic and other required material for manufacturing our product range. Further, being an ISO 9001:2008 certified company; we make sure that our range is quality tested by our quality inspection team on various parameters.

Clientele

We have been serving our wide clientele since years with our impeccable range. We have been delivering high quality Centralized Centralised Lubrication System in domestic as well as international market. Some of our esteemed clients are Hero Honda Motors Ltd., HEC Ltd., Bajaj Ltd., Cipla Ltd., TISCO, INDALCO, MICO Ltd., Escorts Ltd. and many more.

Market Covered

Domestic & Worldwide

Hand Operated Piston Pumps

We hold substantial expertise in making available superior quality Hand Operated Piston Pumps. Hand Operated Piston Pumps are commonly used to move liquids and compress gasses in various industries. We offer varied models with different specifications of our Piston Pumps that are used extensively for their excellent performance. Our Hand Operated Piston Pumps are easy to operate and are available at very reasonable price.

Motorised Lubrication Units

To cater our clients extensive needs, we make our Motorised Lubrication Units available in single phase and three phase. Suitable for intermittent operation, our Motorised Lubrication Units are available in different models with varied specifications. With the help of the Electronic lubrication timer or controller, the lubrication can be done automatically. Further, we are also capable of developing customized range as per the specifications of the client.

Metering Injectors

Leveraging on our vast infrastructure, we offer a wide range of Metering Injectors. We offer Metering Injectors made up of high quality material. They are available in varied versions as per the dosage. Our Metering Injectors are available in M.S. as well as brass with honed bore Nitrile rubber parts. Known for its dimensional accuracy and accurate dosage, our Metering Injectors are excessively used in various industries for numerous applications.

Lubrication Timer

Backed by our adroit team, we are instrumental in offering premium quality Lubrication Timer in the market. Our Lubrication Timer is used in various lubrication systems where pressure switch and float switch are provided for sensing the pressure load. Known for accurate measurement and precise fabrication, our Lubrication Timers are in great demand in the market.

Lubrication Controller

Our expertise lies in manufacturing, exporting and supplying premium quality Lubrication Controller. Our Lubrication Controller is used with various automatic lubrication systems to feed lubricants to various parts of machine on timely basis. Our Lubrication Controller can be designed as per the customer's specification at nominal price.

Hydraulic Piston Pump

With the help of our proficient engineers, we are able to offer the customers with unparallel quality Hydraulic Piston Pump. The Hydraulic Piston Pump offered by us is appreciated widely and is used for saving energy and other related applications. Our Hydraulic Piston Pump is commonly used in marine industry and is appreciated for its durability, sturdy construction and high efficiency.

Dual Line Manual Grease Pump

We are reckoned as a trustworthy Manufacturer and Supplier of high quality Dual Line Manual Grease Pump. Our Dual Line Manual Grease Pump is used in various industries for greasing the bearings and various other moving parts of the machinery. The Dual Line Manual Grease Pump can be availed at very competitive price.

Pneumatic Grease Pump

With our domain expertise, we offer our customers with the fine quality Pneumatic Grease Pump. The Pneumatic Grease Pumps made available by us are widely appreciated for their efficiency and are used for automatic feeding of oil or grease over the motor pulley, ball bearings, and other moving components of vehicle. The clients can avail our Pneumatic Grease Pump at reasonable price from us.

Radial Lubricator

Backed by an adroit team of personals, we are instrumental in offering Radial Lubricator in the market. Our Radial Lubricator being high in functioning, and easy to operate, is widely used for various machines and plants where high pressure lubrication is required. The clients can avail the Radial Lubricator at nominal price.

In-Line Filter

Manufactured with extreme precision and quality scrutiny, In-Line Filter is the result of a successful endeavor of our technicians and engineers. Our durable basket type of In-Line Filter is suitable for flow up to 200 LPM. The element and body of the In-Line Filter is mainly suitable for mineral and petroleum based oils. We provide varied filtration rating or micron size of element as per the customer requirement.

Barrel Pump

We hold considerable knowledge of manufacturing, exporting and supplying high grade Barrel Pump. Our Barrel Pump is suitable for different barrels and is extensively used in various industries for transferring oils and liquids from the barrel. Our easy to operate and fuel efficient Barrel Pump are widely demanded in the market. The clients can avail our Barrel Pump at very reasonable price.

Oil Recirculation System

PRODUCTS

We are reckoned as a trustworthy Manufacturer and Supplier of high quality Dual Line Manual Grease Pump. Our Dual Line Manual Grease Pump is used in various industries for greasing the bearings and various other moving parts of the machinery. ThaBy keeping a track with the latest market developments, we are instrumental in offering gamut of Oil Recirculation System. Our Oil Recirculation System comprises of In-Line Filter, Motor Pump Assembly, Pneumatic Grease Pump, and Hydraulic Piston Pump. We manufacture the Oil Recirculation System using high quality material under the strict guidance of the experts. Our Oil Recirculation System is extensively used in varied industries for various applications and is considered durable and highly trustworthy.e Dual Line Manual Grease Pump can be availed at very competitive price.

Motor Pump Assembly

We are instrumental in offering high quality Motor Pump Assembly. Manufactured with extreme care and quality scrutinized methods, our Motor Pump Assembly is highly efficient and is reckoned for its robust construction and durability. Our Motor Pump Assembly is widely used in varied industries for its ultimate features.

Specifications

Reservoir Cap. : 3Ltr, Motor, 12kw.415v AC

Discharge : 1Lpm

Pr. Setting : 12-15 kg / cm² with pressure switch and float

switch (vertical / horizontal)

Optional : Electronic lubrication controller
