COMPANY PROFILE

Our Company **A. Americans Pipe Benders Co.** has modern tool production lines and a group of experienced technicians. In recent years, we paid special attention to collecting advice from our customers and made fruitful technical renovations. Our product has reached the leading level in the tool industry.

Our main products include Jack Planes, Block Plane, Bevelled Edge Chisel, Mortise Chisel, Carving Tool Set, Hammer & Hand Saw, Pincer, G-clamps, Pliers & Hand Tools Etc. With the reliable quality and steady performance, our products are welcomed at home and abroad market very much. Products are sold at home and abroad and the international market network was established.

Quality & Technology:

Our products can be found in many countries around the world, With years of experience, our quality and technology are second to none. In our pursuit of Perfection, We often push beyond the industrial standard to become the leader in performance, technology, and innovation.

We look very much forward to entering into business relationships with customers from all over the world based on mutual benefits.

Cooperation Principle:

We Take "Quality First, Customer Utmost" as our principle and strive for customer satisfaction with our fine work in every detail. Our goal is to develop a long-term business relationship with every customer. We ever cooperate with, by providing quality products and services, and continuous improvements.

DESCRIPTION

AGUANT gouges are forged from special chrome vanadium alloy steel and heat treated under the strict supervision of qualified heat treatment experts ensuring their best performance.

These are similar to chisels but with a curvature on the blade - they are the most frequently used carving tools. Used for grooving, or when turned over, for carving convex shapes. They are available in various sizes and sweeps.

The size of the sweep selected will vary with the amount of work the tool is required to use. Higher the number of the gouge, the greater the blade sweep or curvature. These are half rounded, finely polished inner surface, fitted with shock resistant polypropylene handles or seasoned hard wood handles. Blades are end protected with plastic caps. A top quality product for professional use.

CHISELS

AGUANT

BEVELLED EDGE CHISELS HSN CODE : 82053000

Product Code	Size in mm	Approx. Weight in gms	Price per Pc.
AA66	12, 18, 25, 32, 38		3290.00

Qty. / CTN	10/100	10/100

TOOLS TIPS

Tips for using Chisels

- Keep both hands back of the cutting edge while using chisels.
- Always shield the cutting edge when not in use.
- Always wear safety goggles when using a wood chisel.
- Never place a wood chisel in your pocket.
- Use the appropriate tool for prying and screwing not a chisel.

Tips for using Planes

- Use the appropriate planes for the work at hand.
 - Use Bench Planes for stock removal, smoothing rough surface, truing and fine finishing.
 - Use Jack Planes or longer planes for longer length planing (i.e. doors) to produce a straight line.
 - Use block or trimming planes for end grain, where single handed working is required and to dress up short work.
 - For optimal cutting performance, place cutter in bench planes bevel side down and cutter for block planes bevel side up.
- Always keep the blade sharp.
- Lightly oil the working surface after use.
 - Rest the plane on its side when not in use.
 - Store the plane with its cutter retracted to avoid premature edge wear.
