Advance Engineering Ceramics, based in Anand (Gujarat) was established in the year 2017. The company has not looked back since then, adopting new concepts and effective designs regularly to meet the diverse requirements of various industries. We are specialists in manufacturing, supplying, and trading ceramic ferrules, deck ferrules, alumina media, porcelain media, alumina ceramic blocks, alumina ceramic tubes, ceramic deburring polishing media, etc. Since our inception, we have employed great resolve in manufacturing quality products. Our focused approach has enabled us to become a leading player in this business. In a short period of time, the company has gained wide recognition in the market under the leadership of our Owner Mr. Sanjay A. Patel.

As we are in this industry for more than 5 years, we have maintained good relationships with many reputed vendors in the industry from where we source the best quality raw materials for manufacturing our product range. Our manufacturing process is carried out using high-tech machines and contemporary technology under the observation of an expert team. We ensure that the products that we offer are developed in compliance with the prevailing industry trends and international quality standards.

The warehouse at Advance Engineering Ceramics is always packed with adequate stocks to meet the urgent and bulk demands of our customers across India. Luckily, we have highly experienced and skilled people in our company. They take care of every aspect of the business in high detail and ensure that everything is handled properly. Each of our employees is aware of the company's quality commitment and puts in the best efforts for the same.
