## ASHWAGANDHA POWDER

Ashwagandha is used to tone, support, and revitalize bodily functions.<sup>1</sup> It has been revered over time for its dual capacity to energize and calm at the same time. Stress can cause fatigue, often manifesting as “hyper” signs like agitation and difficulty sleeping. By providing a nourishing, energizing effect, you can support a healthy nervous system. When the stress doesn’t impact the nervous system as strongly, the “hyper” signs will naturally resolve over time,<sup>2</sup> allowing for a calming effect. This quality of ashwagandha makes it a prime supplement to use in the toning and rejuvenation process.<sup>3</sup> In addition to its dual energizing/calming effect, ashwagandha offers a number of benefit

But, do you know that papaya leaf could also bring you totally diverse health benefits? In this article, we already have 20 health benefits that you could get for your body if you maximize the use of papaya leaves.

## GINGELLY OIL

If you are a TAMILIAN, most probably your grandmother would have told you to have a bath on atleast Diwali day. In Tamil literally means 'good oil' and it refers to sesame oil also known as gingelly oil or til oil. And for many TAMILIAN households at least a generation back, bi-weekly 'good oil' bath is a must. Also, gingelly oil finds its way into cooking in traditional foods. When I was a child, I detested its taste but my mom tactfully used it in her cooking and the taste slowly grew upon me and later when I learnt more about the gingelly oil, I am happy my food intake includes it. Sesame has its origin in India and so it's not surprising that Ayurvedic manuals has a rich reference to a lot of health benefits in it as well as used it extensively in our traditional cooking especially in South India. It also happens to be one of the earliest extracted crop-based oil by mankind.

## GROUND NUT OIL

Grounding™ is a relaxing and balancing blend of essential oils that provides a stabilizing influence. Emotional chaos can lead to poor decisions. Grounding helps you cope with reality in a positive manner. Removing an excess electrical charge from an object is called grounding. Removing an excess emotional grounded charge can also be a form of grounding. Tree and root oils are wonderful to help you get reconnected. If you picture the root system of a tree as an extension of your feet you'll get a visual feel for what it means to be grounded as that root system anchors you to the earth. Picture emotional energy/electricity coming from the earth up one leg and exiting out the other. For me, being grounded does not mean "control". Instead, being grounded is letting things take it's natural course.

## NEEM OIL

Neem oil is extracted from the whole fruit and seeds of the tropical tree *Azadirachta indica*, also known as the Indian Lilac. As the name indicates, this tree is indigenous to the Indian subcontinent where it enjoys the status as a sacred tree and cure-all. This medium-sized evergreen tree now has a worldwide distribution, growing wild in almost any kind of soil and terrain in the tropical and subtropical regions of the world. In India, it is commonly cultivated in many home gardens. In the earlier days when it was quite common for every family to have a dozen or more children, a neem tree in the backyard could meet most of their medical needs. Even the wind blowing through the foliage is thought to have healing properties. Neem tree was the proverbial medicine chest that provided effective cures for anything from intestinal worms to skin ailments and fevers. Despite their bitter taste, neem twigs crushed at one end served as toothbrushes, and the flowers would be used in cooking.
