

Mr. Deendayal Jhanwar Chairman of Ramakrishna (Jhanwar) Group after his 40 years of complete devotion to textile Business at the age of 62 decided to pay the debt of the society and started organic farming at his native place Napasar, Dist. Bikaner, Rajasthan from 5th August 21 with a motto to promote and encourage the farmers of the area for organic farming instead of doing chemical farming. He strongly believes that the best way to promote healthy living is by using natural and traditional herbs as such he planted 1500 Moringa and around 100 trees of various Ayurvedic medicines like Sweet Neems, Arjun, Harsingar, Kanchana, Plash, Neem Giloy Saresh, Nargundi, White AAK and Kadwa Aloe vera. After one year the growth of the plants was found satisfactory in the extreme climatic conditions of Rajasthan. After discussion with nearby farmers, he realised that none of them were ready to do organic farming until and unless the farmers were shown an example that they can earn in agriculture without using pesticides. However they were convinced to leave chemical farming if Deendayalji promised to buy their Moringa leaves and Drumstick (Fruit).

After thoroughly thinking Deendayal

came to the conclusion that merely by selling leaves we cannot survive. So he decided to form a company "RAMKRISHNA AYUSHVEDA PVT. LTD. as on 1st August 2022 and installed the required plant and machineries.

The result of trial production is world class as per test reports of Reputed Lab. Now, we are going to market it worldwide online as well as offline.

We have tested Wheat Grass Powder also and it will be available by Dec-2023, Fig fruit by Aug-2023, Dry Fig by Dec-2023, AMLA candy, and Murabba in mid 2024.

We are also promoting the plantation of Moringa trees by conducting seminars in our farm and showing and encouraging farmers to organic farming the response of the farmers is very positive so we think by coming July more than 5000 plants will be planted and We will buy leaves and drumsticks from them.

The production capacity of this factory is 300 Kg. per day subject to the availability of raw materials.

Natural Moringa Leaf Powder

Business Type : Manufacturer, Exporter, Supplier

Physical Appearance : Homogenous Light Green Powder

Aroma /Taste : Characteristic

Moisture : < 8.0%
