

DEEP CHEMICALS

Deep Chemicals is a year-old company that is actively involved in serving varied product demands of the clients in the international marketplace. We operate as an exporter and supplier of different variants of zinc powder.

DEEP CHEMICALS is a year-old company that is actively involved in serving varied product demands of the clients in the international marketplace. We operate as an exporter and supplier of different variants of zinc powder. The range is inclusive of zinc ash powder and zinc sulphate powder. Ours is a group of industry experts, who work diligently to achieve our company goals of becoming a leading market player. At Deep Chemicals, we aspire to help clients perform better at their area of operations. Thus, we modify our trade activities to fulfill the ever-changing demands of the clients.

A sole proprietorship firm, Deep Chemicals is growing under the headship of Mr. Dharmik Dudhai. He started company operations in 2018 with an aim to become a preferred trade partner of retail and bulk product buyers. The company is based in Ahmedabad (Gujarat, India) and we are recognized for processing the client's requirements with care and on time.

OUR RELIABLE RESOURCES

The management of Deep Chemicals comprises product sourcing agents and distributors among others. With their strong support, we ensure brilliant inventory management and scheduled shipments across the globe. Our associations with reputed manufacturers of the products enable us to entertain the emerging demands of the clients with ease.

WHY DEEP CHEMICALS?

Points to ponder our name are listed below :

- We accept payments through different modes – online and offline
- We process tailored demands for packaging and labeling
- We are acknowledged for on-time and doorstep shipments
- We charge nothing extra for processing urgent and bulk orders
