## PRODUCTS

Container Liner

We cater a huge gamut of high quality container liner that is extensively used for packing and transporting bulk materials such as wheat, rice, coffee, pulses etc. We have firmly positioned ourselves as one of the distinguished cargo container liner manufacturers in India. Our truck container liner is manufactured from the uncoated and coated Polypropylene / High density Polyethylene woven Fabric, cross laminated Polypropylene films, Polyethylene heavy gauge film and HDPE Fabric reinforced films.

We provide an ample array of superlative jumbo bags that is made up from High Density Polypropylene and Polyethylene. Our FIBC jumbo bags are widely used by the manufacturers of cement, sugar, plastics, chemicals etc. to store and transport the products safely. Our woven jumbo bags have the capacity to store 500-2000 kgs of material and protect them from any type of damage. They are available in various sizes, features and designs to match the various needs of the client. Our FIBC big bags can be recycled again and provide excellent performance.

Woven Jumbo Bags

Flexible Intermediate Bulk Container

Backed by an efficient network and trustworthy resources, we have emerged as a dominant supplier of Flexible Intermediate Bulk Container in the market. Hailing from Vadodara (India), we are engaged in catering to all the customers by reaching their preferred destination.

The Dry Bulk Container Liner is a bag of the size of a standard 20 feet, 30 feet or 40 feet ISO container. The liner lines the inside of the container walls and hence the packed material is safer than in any sack or FIBC (Jumbo bags/Big Bags/1 ton bags). The walls of the container support the weight of the material packed and therefore there are no chances of material damage or loss. To prevent the bulging of the liner after the material has been filled there are various provisions.

Q Baffle FIBC  
Bags

FIBC (Flexible Intermediate Bulk Container) also known commonly as Jumbo bags, Bulk bags, Tote bags etc. are an efficient and economical way of packing dry bulk material. FIBC come in various shapes, sizes, capacity and specification depending on the product to be packed in them. The common range of FIBC varies from 500kg to 2.5tons. Various options in FIBC are available in the following combination.

A flexible intermediate bulk container (FIBC), bulk bag, big bag or super sack, is an industrial container made of flexible fabric that is designed for storing and transporting dry, flowable products, such as Sand bags for cement , Building Materials , Sand & Minerals for internal or exports Purposes

PP Woven Contain-  
er Liner Bags

We specialize in Container Liners for 20' & 40' containers. We produce the liners made out of woven PP, woven PE and PE Film. These liners are suitable for carrying dry bulk cargo such as polymers, cement, fertilizers, and various other granular materials. We have world class technology to produce PE lm based liquid container liners. These are made from virgin polyethylene (film or woven polyolefin), thus agricultural produce and high value chemicals can be transported safely in an enclosed chamber. Using JET TECH container liners is one of the most economical and fast solution for the Bulk Cargo movements.
