

INDONET
Do more. Be more. | **GROUP**

DO MORE. BE MORE.

A Legacy of Innovation, Trust, and Quality

Our journey repletes with enriching experiences with our customers, team members, vendors, and stakeholders, who have always been our inspiration to innovate and constantly upgrade ourselves with the changing times.

Keeping up our penchant for excellence and commitment to quality, we have evolved to Indonet Group, a group company for six sister companies.

Indonet is a renowned and reliable name in manufacturing, importing, and supplying various kinds of extruded plastic netting and a Geosynthetic range of products. Our hallmark lies in high-quality products that ensure durability and easy adaptability, apart from being environment-friendly. From manufacturing to business activities, the entire process at Indonet is carried out by a team of talented and experienced industry professionals, who ensure the use of the best quality raw material during manufacturing to ensure the highest possible quality.

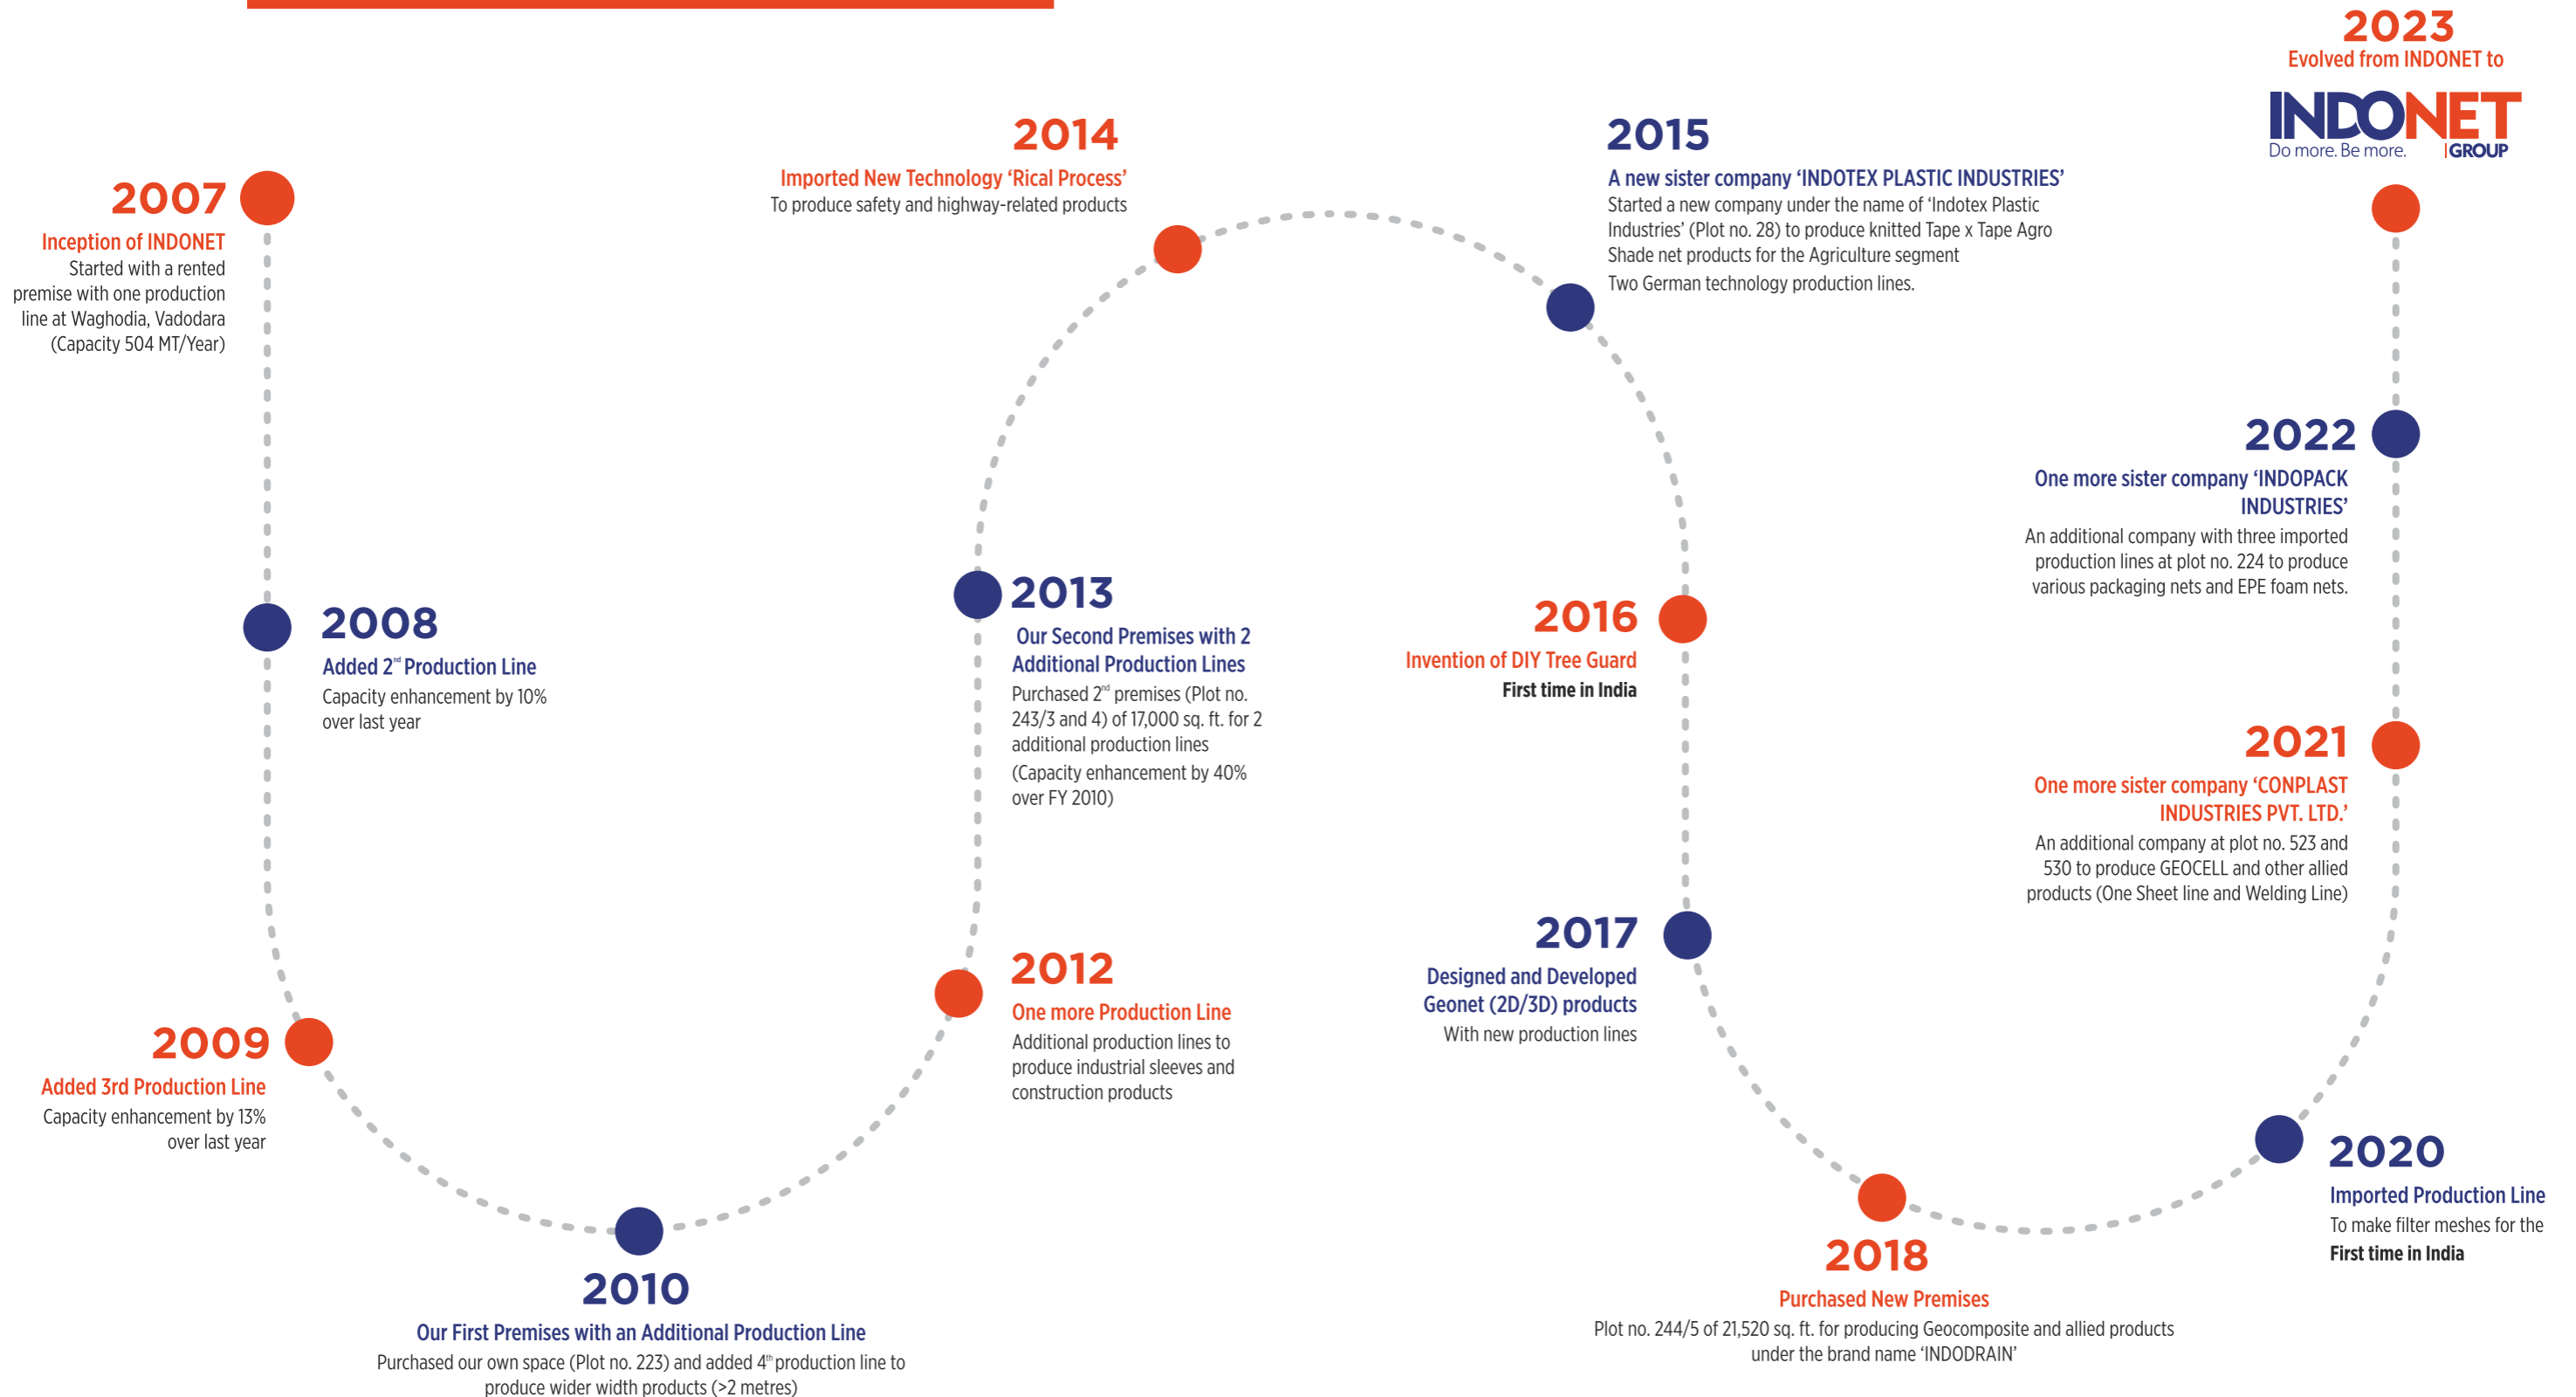

MISSION

To ensure highest customer satisfaction by offering thoughtful engineering, innovative design and green manufacturing processes while safeguarding the future and environment.

VISION

To become the best in the industry by providing an array of effective, sustainable, and innovative netting solutions vis-a-vis creating a great work environment through innovation in products and prompt services.

Customer Centric Approach

At Indonet, the customers are at the core of all planning and operations.

Employee Empowerment

For organisational and overall development, we ensure we are aligned with our employees in terms of thoughts, ensuring highest employee satisfaction.

Operational Excellence

Real-time experience and expert planning to attain objectives.

Netting Strong Advantage

Indonet Group thrives on delivering technically sound and effective solutions. The superior quality, durability, and sustainable attributes with the ability to provide customised solutions has made Indonet Group a preferred solution provider.

Robust Infrastructure

Our state-of-the-art production and sales facility houses some of the most sophisticated machinery in the industry. Moreover, all products are manufactured using the best quality raw material and pass through stringent tests, ensuring the highest possible quality.

Experienced Team

From manufacturing to business activities, the entire process is carried out by a team of talented and experienced industry professionals thus greatly reducing manufacturing cost while enhancing process efficiency.

24/7 Customer Support

24/7 Customer support to understand and address the queries/concerns of our valued customers and help them choose the best products for their requirements.

All our business services are driven by ISO 9001:2015 standards to help clients achieve maximum business success

THE INDONET EDGE

With thoughtful engineering and innovative design, all products at Indonet Group are made with excellence and are sustainable in approach. Indonet Group believes in making everyday lives simpler, the planet greener, and mankind connected with nature.

REAP THE BENEFITS OF CUTTING-EDGE TECHNOLOGY

When it comes to agriculture and gardening, you can always depend on our products. Agricultural activities demand protection from the scorching sun in greenhouses, nurseries and shade houses, which reduces evaporation and mitigates risks posed by damages caused by nature, insects and rodents. Our products ensure your peace of mind with their consistent quality and reliable durability.

PRODUCTS

- INDONET URE Fencing - First time in India**
- INDONET Fencing Net - Hexagonal | Square**
- INDONET Turf Guard**
- INDOTEX Agro Shade Net**
- INDONET Plastic Mountage**
- INDONET Nursery Table Mesh (URE)**

INDONET URE Fencing Net:

Dimensions
Width: 1.0 | 1.2 | 1.5 | 2.0 m
Length: 25.0 m or customised
Color: 🟢 Green, ⬛ Black

INDONET has designed and developed the ULTRA REINFORCEMENT EDGE NETTING (URE) for the 1st time in India. The top, middle, and bottom reinforced edges provide extra strength and stiffness.

Features • Recyclable and Easy to Install • UV Stabilised and Extra Strong • Premium Finish and Attractive Look
Applications • Parks and Gardens • Poultry Farms • Construction Sites • Sports Fields • Balconies and Railing

INDONET Fencing Net:

Dimensions
Width: 1.0 | 1.2 | 1.5 | 2.0 m
Length: 25.0 metre or customised
Color: 🟢 Green, ⬛ Black, 🔵 Blue, 🟤 Brown, 🥈 Silver

It is manufactured using high-quality HDPE material. The fences are manufactured in three designs: Hexagonal | Diamond | Square

Features • Recyclable and Long Lasting • UV Stabilised • Lightweight and Easy to Install
Applications • Parks and Gardens • Poultry Farms • Construction Sites • Sports Fields • Balconies and Railing

INDONET Turf Guard Mesh:

Dimensions
Width: 1.0 | 1.2 | 1.5 | 2.0 m
Length: 25.0 m or customised
Color: 🟢 Green

It is a tough extruded plastic mesh for permanent reinforcement of grassed areas. It can be laid on existing grass areas and seed can be sown over the mesh. It comes in a Hexagonal and Diamond structure which ensures effective anchoring of the roots, while efficiently protecting the grass from being pulled up.

Features • Reduce Grass Wear • Suitable for New and Existing Areas • Flexible, Lightweight and Easy to Install
Applications • Parks and Walkways • Roads - Occasional Access • Golf courses - on Driving Range • Taxiways - Light aircraft

INDOTEX Agro Shade Net:

Dimensions
Shade Factor: 50% / 75% / 90%
Width: 3 | 6 m
Length: 50 m
Color: 🟢 Green

It is a knitted fabric made from High Density Polyethylene by using the Tape x Tape process. It provides paramount protection to plants from bad weather conditions.

Features • UV Stabilised • Lightweight • Easy to Install
Applications • Green House • Shade House • Poly House • Nurseries

INDONET Plastic Mountage:

Dimensions
Length: 0.9 m (Width) and 11 folds (Corrugated)
Color: 🟢 Green, 🟡 Yellow

It is a corrugated mesh that is widely used for Silkworm breeding or sericulture. The corrugated form is helpful in the uniform formation of cocoons with good hygiene and productivity in sericulture.

Features • Long Lasting and Reusable • Easy to Store and Transport • Cost-effective
Applications • Sericulture

INDONET Nursery Table Mesh (URE):

Dimensions
Width: 1.0 | 1.2 | 1.5 | 2.0 m
Length: As per table size
Color: 🟢 Green

INDONET has designed and developed URE Mesh for nursery tables for the first time in India. It is widely used for table nurseries as its reinforcement edges provide more stability, rigidity and perfect fitting on the tables.

Features • Non-corrosive • Easy to Install • UV Stabilised • Extra Strong • Premium Finish • Attractive Look
Applications • Table Nurseries

BUILDING BRIDGES OF TRUST AND RELIABILITY

Widely used in civil engineering, our Geosynthetics product range is suitable for use in the ground where high levels of durability is required and we offer customised products to our customers that open up multiple possibilities for them to explore and expand.

PRODUCTS

INDODRAIN Geocomposite

INDODRAIN Salt Barriers

INDOKON Geocell

INDOKON Coir Geotextile

INDODRAIN Geonets

INDOKON Dimple Boards

INDODRAIN Geocomposites:

Dimensions

Width: 2.0 m
Length: 50 | 100 m

It is designed to ensure a high-performance flow rate and strength. It is manufactured by bonding Geonet and Geotextile in different combinations. Ex: Filter-Net-Filter / Filter-Net / Filter-Net-Membrane

- Features** • Enhanced Drainage Performance • Fast and Easy to install • Cost-effective • High Compression Resistance • High Chemical Resistance
Applications • Roads and Railways • Landfill • Airport Terminal and Runways • Tunnels and Mining

INDODRAIN Geonets:

Dimensions

Thickness: 4 | 5 | 8 | 10 m
Width: 2.0 | 3.65 m
Length: 50.0 | 100 | 150 m

It is designed in a way that two sets of polymeric grids are crossed at a constant angle, forming a diamond structure with uniform channels and thickness to provide better water flow under high loading.

- Features** • Enhanced Drainage Performance • Fast and Easy to install • Cost-effective • High Compression Resistance • High Chemical Resistance
Applications • Road and Highways • Railways • Landfill

INDODRAIN Salt Barriers:

Dimensions

Width: 2.0 m
Length: 100 m
Overlapping: 100 mm (Filter)

It is developed specifically to replace the traditional 300 mm crushed stone granular layer to reduce the environmental impact. It is achieved by avoiding the use of a primary resource.

- Features** • Fast and Easy to Install • Cost-effective • UV Exposure • Chemical Resistance
Applications • Coastal Areas • Waterways • Road and Highways

INDOCELL Geocell:

Dimensions

Depth: 75 | 100 | 150 | 200 mm
Weld Space: 356 | 445 | 660 | 712 mm
Thickness: 1.2 | 1.5 | 1.65 mm

It is a three-dimensional cellular confinement system manufactured by an extrusion process using Polyethylene. These honeycomb-shaped cells are used for erosion protection of slopes, enhancing load carrying capacity of weak soils. The cell walls are permeable to water, air and nutrients while increasing stability and vegetative performance.

- Features** • Fast and Easy to Install • Easy to Transport • Lightweight
Applications • Slopes and Embankments • Road and Railways • Landfill and Contaminated Sites

INDOKON Coir Geotextile:

Dimensions

Width: Up to 2.4 m
Length: Up to 50 m

It is manufactured from 100% coconut fibre with top and bottom stitched with a UV-stabilised black polyethylene net. The coconut fibre is distributed evenly within the net in a roll form. The blanket has a life span of 3-4 years in normal conditions.

- Features** • Fast and Easy to Install • Biodegradable • Cost-effective • Life span of 3-4 years
Applications • Slopes and Embankments • Road and Railways • Landfill and Contaminated Sites

INDOKON Dimple Boards:

Dimensions

Dimple Height: >8 mm
Thickness: 0.5 | 0.6 m
Width: 1.8 | 2.0 m
Length: 50 m

It is a modular sheet that provides effective protection to waterproofing membranes and drainage for underground structures. Dimples create an air gap for ventilation and allow inflow.

- Features** • Avoids the clogging of the Main Drain System • Lightweight and Easy to Install • Weather Resistance • High load-bearing Capacity
Applications • Underground walls • Tunnels • Landscape • Sports fields

WIDENING THE INFRASTRUCTURE HORIZONS

At Indonet Group, we have had the pride of being associated with multiple government-based infrastructure projects, as well as private company projects that have become part of the city's skyline. With a diverse and customised product range, we have become one of the most reliable names across the construction industry spectrum.

PRODUCTS

INDONET Barricade Net / Orange Safety Net

INDONET Plaster Mesh

INDONET Gutter Guard Mesh

INDONET Protection Mesh

INDONET Rockshield Mesh

INDONET Warning Tape

INDONET Barricade Net / Orange Safety Net:

Dimensions
Width: 1.0 m
Length: 50.0 m
Colour: 🟠 Orange 🟦 Blue
 🟩 Green 🟡 Yellow

It is an extruded mesh used as a warning barrier in multiple areas. The fence is highly visible, light in weight and UV treated.

Features • High Visibility • UV Stabilised • Lightweight and Easy to Install
Applications • Construction Sites • Road and Highway Sites • Temporary Snow Control • Pipeline Projects

INDONET Gutter Guard Mesh:

Dimensions
Width: 160 | 180 mm
Length: 6 | 8 | 10 m or customised
Colour: 🟤 Black

It is manufactured using recycled material. It is widely used to prevent blocking the gutters.

Features • Recycled Material • UV Stabilised • Lightweight and Easy to Install • Long Lasting
Applications • Parks and Garden • Housing Society and Apartments

INDONET Protection Mesh:

Dimensions
Width: 300 mm to 1500 mm
Length: 25.0 | 50.0 m or customised
Colour: 🟠 Orange 🟥 Red 🟡 Yellow

It is manufactured from high quality material. It is widely used as a warning net/protection net in underground pipeline construction works.

Features • Suitable for Underground Lines • Extra Strong • Easy to Lay
Applications • Electrical Cable Line • Water Pipe Line • Telephone Cable Line

INDONET Plaster Mesh:

Dimensions
Width: 1.0 m
Length: 25.0 m or customised
Colour: 🟤 Black

It is manufactured using recycled material. It is mostly used to prevent cracks on concrete surfaces.

Features • Easy to Apply • Weather Resistance • Lightweight
Applications • Concrete Surfaces • Beams • Cold Water Proofing System

INDONET Rockshield Mesh:

Dimensions
Thickness: 4 | 6 | 11 mm
Width: 1.2 | 1.5 | 2.0 | 2.5 m
Length: 25.0 | 30.0 m

It is a heavy-duty pipeline mesh that protects pipeline coating from rock backfill. The diamond design of the mesh allows for the free movement of water around the pipe for cathodic protection.

It can be installed in three methods: • Longitudinal wrapping • Latitudinal wrapping • Spiral wrapping by using PP straps

Features • High Compression Strength • Impact Resistance • Fast and Easy to Install • Weather Resistance
Applications • Gas Pipelines • Offshore Purposes

INDONET Warning Tape:

Dimensions
Thickness: 100 microns
Width: 150 mm | 300 mm
Length: 200 m

Underground Warning Tape with a printed warning message is a coloured polyethylene for marking buried services. It can be customised to specification in any size, colour and language.

Features • High Visibility • Fast and Easy to Install • Weather Resistance • Customisation available
Applications • Pipelines - Water | Cable | Electric • Roads and Highways • Construction Sites

MAKING A MARK ACROSS DIVERSE INDUSTRIES

At Indonet, our product range caters to the needs of diverse industries and offer reliable solutions that not only add value but also ensure durability for years to come.

PRODUCTS

INDONET Protective Sleeves

INDONET Filtration Net

INDONET Infusion Mesh

INDONET Separation Net

INDONET Protection Net (AC / Air Cooler)

INDONET Protective Sleeves:

Dimensions

Length: 25 m or customised
Diameter covered: 6 mm to 500 mm
Pre-cut: Available as per requirement

It is a tubular net made of a special blend of polyethylene to provide cushion characteristics to protect valuable items from collision and damage caused during handling, storage and transport.

Features • Highly Elastic • Large Range • Easy to Apply • Colour Coded for Easy Identification • Recyclable and Reusable
Applications • Machined Parts • Precision Components • Wine, Liquor and Glass Bottles • Gas Cylinders • Drums and Barrels • Sanitary Ceramic

INDODRAIN Filtration Net:

Dimensions

Max Diameter: 550 mm
Min Diameter: 65 mm

For the 1st time in India, INDONET has introduced flat extruded nets and tubular sleeves for the filtration industry, mainly for air, hydraulic, fuel and reverse osmosis filters.

Features • Rigid Flat Netting • FDA Approved • Easily bonded / welded fast
Applications • Spacer for Membrane • Outer Wrap for Cartridges • Pleat Support for Filter Medial

INDONET Infusion Mesh:

Dimensions

Resin: HDPE | PP
Width: 1.2 | 1.5 m
Length: 25.0 | 50 m
Colour: Green

It is an extruded mesh, ideal for the resin infusion process for wind blades, turbines and marine applications. It is applied to the flat mould surface for the uniform flow of the resin.

Features • Enhanced Liquid and Air Flow • Reduces Fill Time • Cost-effective
Applications • Wind Blades • Wind Turbines and Marine

INDONET Separation Net:

Dimensions

Thickness: 2.0 | 3.0 mm
Width: 1.0 metre or pre-cut
Length: 25 m or pre-cut
colour: Black Green Grey

It is an extruded flat net made from polyethylene for separation, protection and handling of all types of finished or semi-finished mechanical components inserted in tanks and containers.

Features • Easy to Apply • Reusable • Recyclable • Cost-effective
Applications • Separation of Mechanical Parts • During Transportation of Semi-finished Parts

INDONET Protection Net:

Dimensions

Design: Diamond | Square
Width: 400 mm to 1500 mm
Length: 25.0 m or pre-cut
Colour: Black Ivory

It is an extruded flat net made from polyethylene for protection purposes at the back of air conditioners and coolers.

Features • Non-corrosive • Maintenance-free • Durable and Recyclable
Applications • Back Side of AC Units • Air Coolers

INDONET PEB Mesh:

Dimensions

Thickness: 3.5 mm
Mesh Size: 28 x 28 mm
Width: 1200 mm
Length: 25.0 m
Colour: Grey

This extruded flat net is made from polyethylene to provide sturdy support for the insulation of PEB structures. It is applied after the insulation of the glass wool/rock wool layer to hold the entire structure.

Features • Non-corrosive • Easy to Install • No-maintenance • Durable • Recyclable
Applications • Back Side of AC Units • Air Coolers

ADDING VALUE TO THE FMCG INDUSTRY

Our Packaging Nets are manufactured by using a specially formulated blend of materials that ensure high quality and durability. This makes our products the ideal choice for FMCG brands and their products, hence being extensively used in packaging fruits, vegetables, toys, and loose goods.

PRODUCTS

INDOPACK Packaging Net

INDOPACK Foam Net for Fruits

INDOPACK Loofah/Bath Sponge

INDOPACK Packaging Net:

Dimensions

Stretched-
Width: 180 mm to 500 mm
Length: 1000 m or pre-cut size
Available in various colours

INDOPACK offers a wide product range for the packaging segment, mainly for fruits, vegetables, toys and other promotional products.

Features • High Visibility • Easy to Use • Durable

Applications • Fruits & Vegetables • Toy Items • Promo pack with branding

INDOPACK Foam Net (EPE):

Dimensions

Size: 50 | 65 | 80 | 90 | 100 mm
Length: Rolls and pre-cut
Available in various colours

It is manufactured from a special blend of polyethylene to provide soft, elastic and cushion characteristics. It protects delicate products during handling, storage and transport.

Features • Flexible and Easy to Use • Hygienic and Non-toxic • Food Grade Material • Cost-effective and Reusable

Applications • Fruits, Vegetables, and Flowers • Fragile Items • Glass Items - Cups, Bottles, Plates, etc. • Small Cylinders

INDOPACK Loofah Bath Sponge:

Dimensions

Weight: 15 to 90 gm
Available in various colours

INDOPACK offers a range of loofahs (bath sponges). They can be used with soap or gel while bathing, allowing you to relax and refresh while relieving body tension.

Features • Suitable for Skin Exfoliation • Ideal for Daily Use • Maintains Hygiene Level • Easy Hanging Rope

Applications • Relieves Body Tension • Allows you to relax

DIY
 (DO IT
 YOURSELF)

EFFECTIVE PROTECTION IN MINUTES

DIY (Do It Yourself) products are flexible and designed in a way that installation of the same doesn't require any assistance. The products provide effective protection against stray animals and birds.

PRODUCTS

INDONET Tree Guard

INDONET URE Fencing Net

INDONET Bird Spike

INDONET Tree Guard

Indonet offers a wide range of polymer mesh tree guards in pre-cut/roll forms. It effectively protects small plants from animals or unwanted harm.

Features • Environment-friendly • UV Stabilised • East to Install • Reusable and Recyclable • Non-corrosive • Cost-effective
Applications • Roads and Highways • Forest Department • Municipality • Nagarpalika and Panchayat • NGOs • CSR Activity

Square Type Tree Guard:

Square-patterned tree guard is designed in a way that it can be easily installed without any support.

Dimensions

Cut Sheet Size: 4 x 6 ft. | 4 x 5 ft.
Diameter after folding: 375 mm
Height: 6 ft. | 5 ft.
Colour: Green or customised
Accessories: Plastic Cable Tie

Cable Tie

Hexagonal Type Tree Guard:

Hexagonal-patterned tree guard is manufactured in tubular forms for easy installation with the support of bamboo or any other fabrication.

Dimensions

Tubular Cut Sheet Size: 4 x 6 ft. | 4 x 5 ft. | 4 x 4 ft.
Diameter after folding: 375 mm | 475 mm
Height: 6 ft. | 5 ft. | 4 ft.
Colour: Green or customised
Accessories: Plastic Cable Tie

INDONET URE Fencing Net (100% Virgin) - Kit Form

Indonet URE Fencing Net is manufactured using virgin quality HDPE material in a kit form. The fences are manufactured in three designs: Hexagonal | Diamond | Square

Features • Recyclable • UV Stabilised • Lightweight • Easy to Install • Long Lasting
Applications • Parks and Gardens • Balconies and Railing • Door and Windows

Dimensions

Pattern: Hexagonal | Diamond | Square
Width: 0.5 | 1.0 | 1.2 | 1.5 metre
Length: 5 | 10 | 15 | 25 metre
Colour: Green Black Brown

INDONET Bird Spike (Kit Form)

Indonet Bird Spike is made from prime grade materials with UV stabiliser for long-lasting use. It is designed in a way that it can be easily fixed and removed.

Features • Easy to Install • Weather Resistant • UV Stabilised • Maintenance-free • Cost-effective
Applications • Villas and Apartments • Commercial Buildings • Industrial Shades

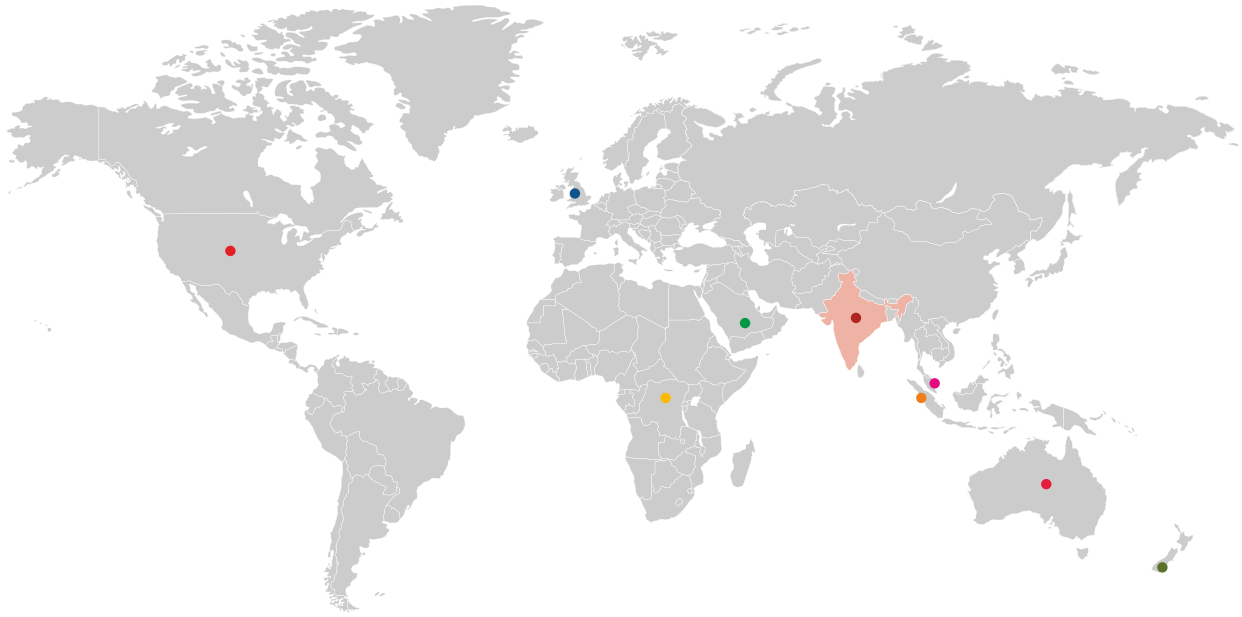

Dimensions

Material: Polycarbonate | HDPE
Spike Height: 90 mm
Cover Length: 1 ft. (After putting each piece in a row)
Colour: Ivory Grey
Box Packing: 10 pieces (Cover Area 10 ft.)
Accessories: Screwdriver + Screw
