Elegantly and safely up the stairs  
with the Alpha curved chair stairlift

# ALPHA

## The chair stairlift for curved staircases

The Alpha stairlift can eliminate the barrier of stairs by providing safe and easy access to another floor. The Alpha is designed to be installed on stairs with a curve, an intermediate landing, or when out-of-the-way parking is desired. Smooth riding, comfortable and reliable, the Alpha stairlift features a double rail system for strength and durability.

The lift is easy to operate with controls on the armrest as well as two radio frequency remote controls. The rails are custom bent to your exact specifications, based on computer-aided design software and photo measuring. This is all done with industry leading lead times. Choose from different seat and rail colours to suit your taste and make the lift fit perfectly into your home.
