ABOUT US

www.anandicashew.co.in

Anandi Cashew provides processed and fresh cashew nuts to some of the big names in the food industry. Our company is successfully registered and licensed under the FSSAI, India. We have been issued clearances for land and other facilities by the District Industries Center (DIC), Thane. Our company can also export cashew nuts to other countries after permissions granted by the Import-Export Authority of India.

Anandi Cashew started as a small cashew nut manufacturing entity but has now grown into a place for roasted, normal, commercial wholesale, and multi flavored cashews which is its specialty. The company began processing raw cashews since March 2015 and has grown into one of the major retailers in the district of Thane in the state of Maharashtra.

The manufacturing unit is located in Pimplas village located in Thane District of Maharashtra. We employ workers on a daily wage basis (preferably female workers), with an aim of providing employment opportunities to women who are economically unstable. The women are trained and then offered jobs in arenas such as heating of seeds, drying and peeling of processed nuts.

We continue to build up on the foundation stone laid back in 2014 and aim to deliver the best quality cashews at affordable prices.

THE FOUNDER

Anandi Cashew was founded under the guidance and leadership of Mrs. Maitreyee Tembhekar, a Ph.D graduate and a visiting lecturer at various reputed colleges as well as universities all across India. After quitting her job as a teacher, she joined the agricultural business line. Our founder was also nominated for the Make In India programme and was felicitated by H.E Shri Narendra Modi, the Prime Minister of India at the Make in India Expo in February 2015. For the flavored cashew innovation she was honored by the DIC, Thane for innovations in business.

She focuses on women empowerment and is one of the prime examples of the same. Self driven women empowerment is her mantra and that is the reason why she employs only females for projects or bulk orders.

Consider a very small fragment of the nut. A very small portion of the nut which is crushed to pieces. Well there you have your new grade! That is why it goes by the name Baby Bites. This kind of cashew is used by restaurants to add taste and flavour to those delicious curries which are served to the people at large. Who knows, if you are having some curry and it tastes better than the others, it is definitely our cashew which is used to prepare it!

Now you are really going to need binoculars to have a look at these extremely small fragments of a cashew nut. Imagine a situation where a nut is crushed several times to get miniature fragments of the same. Well there you have it, the kani grade. This grade is close to the powdered cashew version, hence it is used by restaurants and street vendors which make thick gravies and curries. If your curry or gravy tastes good at any restaurant visit, you know by now whose cashew nuts have been used to make those.
