

About Us

Kalyani Polymers Pvt. Ltd.

Kalvani Polymers Pyt Ltd. was founded by Nama Srinivas a commerce graduate with a graduation in Law in the year 1995, he had a vast industrial experience of 20 years in Krishna Fibers, a leading firm in the 1980 in Packaging, Srinivas was chosen to lead the innovation team and in charge of importing Looms from Lenzing -Austira and set up a woven sacks manufacturing industry for food, sugar and cement packaging.

His vast experience in this field exposed him to start his Entrepreneurial journey and establish a Proprietorship concern in 1992 in the name of his wife "KALYANI" which lives on till today. His Astute vision and attention for detail was very impressive and was in the forefront of all innovations in the early years of the company.

His Philosophy of never turning down a challenge was highly commendable and it let through many breakthroughs.

- Development of winders for Cheese winding
- Monoaxially Oriented Films using T Die Extruder
- Plasma Treatment for Slit Film Tapes of 2mm width etc

Many such innovations are remembered by our Team each day and we carry forward the vision.

The Origin Story

Having started with humble beginnings in 1992 with 15 MT/Month, we have come a long way in establishing a annual production output of approximately 300MT/Month in 2021.

KPPL started initially manufacturing Yarns for Jelly Filled Telephone Cables and later started to manufacture Fibrillated Yarns for various applications, although we do manufacture this to this day, the % has shrunk over the years.

The Time Line gives a good idea on where we came from and where we want to go moving ahead.
