OUR PRODUCTS

Global G.A.P. (Good Agricultural Practices) Consultancy

New pressures from consumers, retailers and legislation have placed new demands on farmers and growers. They are increasingly required to use production techniques that reduce the impact of farming on the environment (land and sea), to reduce their use of chemicals, and to make efficient use of natural resources, while safeguarding the welfare of both workers, farm animals and sea life.

GMP Consultancy

A good manufacturing practice (GMP) is a system for ensuring that products are produced and controlled consistently according to quality standards. It is designed to minimize the risks involved in any food, pharmaceutical production that cannot be eliminated through testing the final product. The main risks are: unexpected contamination of products, causing damage to health or even death;

GHP Consultancy

GHP is a system for ensuring that products are produced and controlled consistently according to quality standards. It is designed to minimize the risks involved in any food, pharmaceutical production that cannot be eliminated through testing the final product. The main risks are: unexpected contamination of products, causing damage to health or even death; incorrect labels on containers, which could mean that receive the wrong medicine

OUR PRODUCTS

FSSC 22000 Consultancy

The FSSC 22000 Food Safety System Certification provides a framework for effectively managing your organization's food safety responsibilities. FSSC 22000 is fully recognized by the Global Food Safety Initiative (GFSI) and is based on existing ISO Standards. It demonstrates your company has a robust Food Safety Management System in place that meets the requirements of your customers and consumers.

ISO 45001 Consultancy

ISO 14001 is a series of environmental management standards. The ISO 14001 standards provide a guideline or framework for organizations that need to systematize and improve their environmental management efforts.
