

# POWER GROW SYSTEM

Manufacturer of  
Street Light Pole, Perforated Cable Tray,  
Ladder Type Cable Tray & Electrical Control Panel.

## About Us...

### POLE

PGS manufactures all kinds of poles at its well-equipped plant which features machinery like Hydraulic Swaging machines, Straightening and Welding Machines and has facilities to produce poles up to the length of 13 meters & thickness up to 8 mm. Customization is also done as per a customer's specifications.

Swaged Poles include Light Poles in single hang & double hang, Street Light Poles, Traffic Light Poles etc., and are made of ERW tubes of suitable lengths swaged and joined together.

### Advantages

- Zero maintenance – no pole fires, insect infestation or pole rot.
- Weighs 50-70% less than comparable concrete structures.
- Custom designs – made to customer's exact specifications.
- Lasts longer - steel poles can last as long as years with no shrinkage.
- No copper wire grounding required.
- Fully recyclable and non-toxic.
- Custom finished to your specification.
- Steel Pipes manufactured as per ASTM specification.

### CABLETRAY....

In the electrical wiring of buildings, a cable tray system is used to support insulated electric cables used for power distribution and communication. Cable trays are used as an alternative to open wiring or electrical conduit systems, and are commonly used for cable management in commercial and industrial construction. They are especially useful in situations where changes to a wiring system are anticipated, since new cables can be installed by laying them in the tray, instead of pulling them through a pipe. We make cable of different sizes from 100mm to 600mm of length 2500mm.

TYPES: Perforated Cable Tray and Ladder Type Cable Tray.
