Royal mineral has a vision to provide mineral products with utmost care and therefore, it uses efficient management techniques that ensure the safety of the environment. Our vision is to continuously be updated with the latest technology in terms of product manufacturing and quality control. We keep looking and researching for techniques that can fully utilize the potential of all mineral products. In addition, our vision is to be the biggest supplier of mineral products as per the budget of the client companies. We have a vision to look into the potential of all mineral products and provide to our clients the finest products available in the market with top-notch quality and safety being the priority.

Royal Mineral is one of the leaders in the niche of suppliers for Cementitious Material (SCM's), Minerals, Metal Concentrates and Construction Material. With all the operation and activities within the vicinity of port renders us well equipped with added edge over our suppliers in the same line of business. Over the period of time, Royal Mineral has been marked its presence in the major markets like Africa, Far East, GCC and America. Prompt and timely execution of the orders from our long list of clients has helped us earn the reputation and name unparalleled. We take pride in a fact that our company has the honour of exporting most number of bulk vessels of fly ash and gabbro aggregates to the Qatar Market which has very stringent and rigid quality standards. Royal Mineral is the only company to send bulk vessel of fly ash to USA market from India.

The company has sound sourcing when it comes to minerals and related products as it has vested interests and has obtained long-term contractual obligations from mine owners. Gujarat and Rajasthan is most resourceful region of India when it comes to the Minerals and Related products. Our strong presence in the region gives us the expertise in sourcing and trading these products. We believe "We succeed and when our client succeeds."

OUR MISSION

The mission at Royal mineral is to expand and provide to clients, the best possible products as per their requirements. We are in the market for the past eight years and have experience backing us in the industry. With a mission and commitment to deliver the top quality mineral products like Aggregate, fly ash, GGBFS, with thorough trial and testing is what we aim for. The agreements of the company in Gujarat with the local mineral power hubs can be taken as an example of us being a leading supplier brand.
