Rajesh India Manufacturing Private Limited was established in the year 2007 in Maharashtra, India. We are Manufacturer, Supplier, Exporter and Service Provider of gold refinery machines, industrial blowers, industrial tank and a lot more. With a very strong focus on the quality of finished products and the raw material in our minds, we make sure we are satisfying our clients to fullest as we aim at producing the best product from our side

## **Quality Compliance**

We thrive on the basis of the quality of our products so we make sure our quality oriented facilities are closer to perfection. As an experienced concern in the market we ensure our products with various tests such as breaking load, hardness test and material test from lab. These tests are performed before the dispatch of the consignment to the client. So as to sustain the quality parameters of strength and durability we use standard raw material like mild steel, stainless steel and dullrin.

Our raw material is taken from the local suppliers which are only assured after conducting lab tests. Accompanied with optimum raw material and perfect production facilities we are able to manufacture the best products to our clients.
