About Us

Bright Tech Engineering And Automation System was incepted in 2010 by Mr. Rajesh A. Jadhav the Managing Director of the company at Pune (Maharashtra, India). Within 7 years of inception, we have gained huge recognition in the market due to the hard work of the Managing Director.

Manufacturing Unit

We have developed a vast and filly-fledged manufacturing unit to design innovative products with unmatched features in bulk. We undertake huge orders of the clients and fulfill them within the stipulated time-frame with the aid of advanced production facilities. The unit is managed by experienced engineers and designers to ensure the production of the best quality products in standard as well as customized specifications.

Quality Standards

As quality is the vital part of the business activities of the company, we adhere to high-quality standards at every production process. We carry out strict quality tests on the products before providing to the clients. Each product is tested for:

- Speed
- Maintenance
- Dimension
- Efficacy
- Durability
- Design

Our Products

SLAT CONVEYOR SYSTEM

We are capable of delivering the orders in a safe manner at customer's end and for this; we have a capacious warehouse that is installed with all required amenities required for safe storage. Due to our commitment towards providing quality approved products to the clients, we source the raw materials only from the well-known and trusted vendors of the market.

Our Products

CYLINDER HEAD & SUB ASSEMBLY LEAK TESTING MACHINE

We are working with highly experienced packaging experts and they make every endeavor to meet the personalized and standard requirements of the clients. We sternly make our product safe from external factors. Place orders with us, timely deliveries of the same are our prime responsibility!

Our Products

NITROGEN DEGASSING MACHINE

Aluminium and aluminium alloys, like the majority of metals in their liquid state can dissolve significant quantities of gas.

The most soluble gas in molten metal is hydrogen. Hydrogen bubbles present in molten metal materialise as porosity during the solidification of the metal. This porosity is harmful to the mechanical properties, sealing and aesthetic appearance of the moulded parts.

Our Products

MOBILE CANTEEN

Raw material that is sourced from the reliable places is used as input in the production procedure. In order to make high quality range of products, we check it for quality prior to sourcing. Buyers can stay rest assured with us for their orders as we ensure zero damage to the products that we deliver. For this, we store the entire lot in a spacious warehouse till the final dispatch.
