

## Fuel Dispensing Machine

## FVM-25

Fuel dispensers are fully electronic with precision metering system, for fueling diesel, gasoline and kerosene, separate and combined pump is both offerable with features like convenient maintenance, high precision flowrate and excellent electromagnetic compatibility.

### Technical Data Sheet

Model :- FVM-025  
Flow Rate :- 0-60/120L/MIN  
Voltage :- AC 220v,  
Power :-550w  
Accuracy :- $\pm 0.3\%$   
Height :-52Cm  
Allocation :auto nozzle, 4Meter Hose

### Technical Data Sheet

Model :- FVM-025-MINI  
Flow Rate :- 0-60/120L/MIN  
Voltage :- AC 220v,  
Power :-550w  
Accuracy :- $\pm 0.3\%$   
Height :-45Cm  
Allocation :auto nozzle, 4Meter Hose

### Application:

Fuel vending and dispensing from storage to construction site vehicle, Mines vehicle, fishing boat, motor bike, D.G. Set tank and many more application of fuel refueling
