ABOUT US

Mod Innovation LLP is a world-class construction equipment manufacturer since 2015.

We have reached the majority of areas of India with automatic plastering machines and other automatic construction equipment in India.

Now we are launching our new product ready mix mortar for plaster and machinery work.

The common problems that occur at every construction site like bringing sand, bringing cement, maintaining the sand properly, and making a proper mixture of sand and cement, if this mixture is not done properly, then the work will not be done well. As a solution to all these questions, we (MOD INNOVATION) have developed a completely new type of ready mix mortar for plaster and masonry which not only reduces labor costs but also gives stronger and better work, also saves time lot.

RIVER SAND

BASE MATERIAL

mod gold plaster

is composition of uniquely designed mix of selected raw materials, it takes far lesser time to cure and retain water comparatively to any other product used in the construction market and therefore making it the Only product in the industry which exceeds the compressive strengths and curing measures set in national standards thus making it one and the only kind of product in its category.

GOLD PLASTER

is specially design for less curing.

APPLICATION CAN BE DONE BY
MOST ADVANCED AUTOMATIC
PLASTERING MACHINE.

FOR INTERIOR & EXTERIOR

Ratio 1:4 Mixture (40kg Bag)

Coverage - sq.ft to 20 sq.ft

Thickness - 10 mm to 12 mm

Admixtures / additives : Self Curing Agents | Natural Fibers | Finishing and Bonding

mod GRC

How to make your exterior wall beautiful as well as backing it with strength.

WHAT IS GRC ?

GRC means Glass Reinforced Concrete. Glass reinforced concrete (GRC) is a type of concrete that incorporates alkali-resistant fiberglass in place of traditional steel mesh or rebar. This makes the concrete much lighter and more Eco - friendly, without losing any of its strength. Glass reinforced Concrete is increasingly being used for commercial and residential projects. Glass reinforced concrete is a relatively new type of concreting product that can give you more flexibility with your designs while still being as strong as traditional concrete.

We modified GRC into Water resistant GRC plaster

Advantages of GRC Plaster

- Light weight & Strong
- Eco - friendly
- Cheaper & Durable
- Long lasting

Also use for cladding, Moulds & Landscaping

mod tile bond

(Grey/White)

For Interior & Exterior

**Polymer modified
cement based tile
adhesive**

**VITRIFIED / WALL / FLOOR TILES
GRANITE DOOR AND WINDOW FRAME**

Gold 20kg Bag

- Coverage : 20 sq.ft to 22 sq.ft
- Thickness : 4mm to 5mm
- Height 4 mtrs.
- Wall & Floor - 1500mm x 750mm

Particular	Result
Material Colour	Grey / White
Pot Life	30 to 45 Minutes
Open Time	>20
Adjustability Time	5 Minutes
Trafficable Time	24 Hours
Tensile Adhesion Strength 28 Days	>1955
EN Standard	C2T

mod AAC block binder

Lock Joining Mortar

MOD AAC+ is a one of kind product specifically engineered by our research and development team to produce a highly advantageous resulting material which strongly benefits its use in Joining of AAC Er ALC blocks.

Useful for masonry of all kinds of autoclaved and aerated concrete blocks.

AAC BINDER PACKING

- 40 kg Bag (Project Pack)
- Coverage : 30sq.ft
- Thickness : 6mm to 8mm
