THE HYCATCH RAT TRAP

Range of glue traps has been specially designed for residential and commercial use, taking into account rodent behaviors. These traps provide a safe, non toxic, convenient and effective solution to get rid of rats and mice from home, offices, factories, warehouses and other areas where the use of poisons is not desirable. An alternative to glue boards that may not hold up as well in damp or humid areas like basements and frequently wet area. The special glue lasts for many years and it can function at temperatures ranging from 0° C. However reasonable precautions such as proper storage (away from excess moisture and extreme heat). The HY-CATCH rat trap also it's conveniently into available rodent bait stations.

DIRECTION FOR USE

Open the boards and place in areas frequented by rodents, Once opened, you can find inside two special glue surface separated by spaces to stop them from sticking to each other. These surfaces are extremely sticky. place usually against vertical surfaces such as walls. For better efficacy, remove dirt and debris in the vicinity. Once a rodent is caught, close and dispose off boards with catch; unused boards can be closed and put away for future use. If no catch is observe for 5-7 days, change location of boards.

CAUTION

Keep away from children, pets and non-target animals, avoid moisture, Dispose off boards responsibly. In case of accidental contact with glue, use vegetable or mineral oil to remove from skin and clothing and wash with soap or detergent. Use paint thinner for easy removal from floors and other surfaces.

Benefits:

- ▶ Water Resistant
- ▶ Durable
- ▶ Non-Toxic
- ▶ Disposable
- ▶ Ready to Use
- ▶ Optimum glue quantity
