

# HERB-O-KILL™

## THE NATURAL WAY TO ERADICATE RODENTS

Herb-o-kill contains no poisonous chemicals and is based on ground maize combined with wheat and a sweet molasses attractant. Herb-o-kill is effective even among rodent populations that are completely resistant to conventional anticoagulants.

### Herb-o-kill unique formulation ensures:

- ✓ No risk to children or pets
- ✓ No risk to livestock or birds
- ✓ No risk of either primary or secondary poisoning - bird of prey friendly
- ✓ No known resistance
- ✓ No special requirement for transport, handling, storage or disposal
- ✓ No risk of contamination to crops or food
- ✓ No environmental pollution - fully biodegradable

Extensive on-farm trials and laboratory tests have shown Herb-o-kill to be as effective as conventional chemical rodenticides

### WHERE TO USE

- ✓ Livestock yards
- ✓ Pig & poultry farms
- ✓ Conventional & organic farming
- ✓ Equestrian centres
- ✓ Game farms
- ✓ Forestry & woodland management
- ✓ Food processing, packing & storage areas
- ✓ Domestic, industrial & retail premises
- ✓ Secure institutions
- ✓ Hospitals
- ✓ Schools
- ✓ Parks & other public areas

### Safe to use on and around farm nature trails

#### Why Herb-o-kill works

- ✓ The specific mode of action of Herb-o-kill and its inherent safety to non-rodents is based on a range of factors unique to rodents.
- ✓ Rodents are opportunistic feeders and can consume up to 10% of their body weight.
- ✓ Rodents cannot vomit or regurgitate.
- ✓ Rodents have a unique digestive system in which the caecum (sack between large and small intestine) plays an active role.

#### How Herb-o-kill works:

- ✓ Herb-o-kill is consumed as a food source as part of a rodent's natural eating habit.
- ✓ After ingestion dehydration commences causing blood thickening & circulatory collapse.
- ✓ Rodents become lethargic, retreat to their burrow where they lapse into a coma and die.

#### What to expect:

- ✓ Rodent activity declines as death occurs within 4 to 7 days of regular feed intake - sightings reduce as rodents generally die in their burrow.
- ✓ Faecal droppings become bleached in colour & larger in size\*.
- ✓ An absence of smell from decomposition due to dehydration A-similar to mummification.

Pack sizes available:  
1kg & 5kg.

## About us

The Samyak Exim has been established at Mumbai (Maharashtra, India) in the year 2016 with a purpose of becoming the market leaders in the years to come. We rely on our team for the success of our organization.

### Quality :

Our products, along with stringent quality tests, undergo various quality tests during collection, sorting, storage, packaging, etc.

### MOST TRUSTED :

Samyak Exim is an integrated Pest Control Solutions & Management company based in Mumbai - The commercial capital of India.

### EXPERIENCED :

Our team of seasoned professionals has an in depth experience in the field of Pest Management.

### INNOVATIVE :

We whole heartedly support the Make In India initiative and our R&D team constantly strives to develop new products in India.

We rely on our team for the success of our organization.

Our motivated and skilled workforce makes it possible to accomplish job orders of varying magnitudes and complexities as per the industry standards.

The team consists of skilled and experienced procurement & sales experts, quality controllers, and others.

We have been delivering quality products since our inception and we refuse to compromise with quality.

Products offered are procured only from the renowned manufacturers.

## Hy-kill™

### Effective & Quality :

High-performing gel bait product targeting all pest species of cockroaches

### Advanced Protection Formula :

Advance performance compound, Cockroach Gel Bait combines a high-consumption bait mix with attractive feed fragrance to attract cockroaches.

### Gel Fragrances :

Cockroaches attract due to odor of gel and eat the bait and take it to their nest to share bait, resulting in killing other cockroaches and destroying the nest.

### Quick Control Cockroach Population:

Cockroaches cannot resist the superior combination and even the toughest populations are quickly controlled.

## Hy-Catch™

Available in 2 Sizes  
**Eco & Regular**

### The Hy-catch Rat Trap

Range of glue traps has been specially designed for residential and commercial use, taking into account rodent behaviors.

These traps provide a safe, non toxic, convenient and effective solution to get rid of rats and mice from home, offices, factories, warehouses and other areas where the use of poisons is not desirable. An alternative to glue boards that may not hold up as well in damp or humid areas like basements and frequently wet area.

### Benefits

- ✓ Water Resistant
- ✓ Durable
- ✓ Non-Toxic
- ✓ Disposable
- ✓ Ready To Use
- ✓ Optimum glue quantity
- ✓ Smaller exposure surface but optimum result
