

PRINTEK

Best solution for outdoor
advertisement and rental.

1. LED DISPLAY WALLS

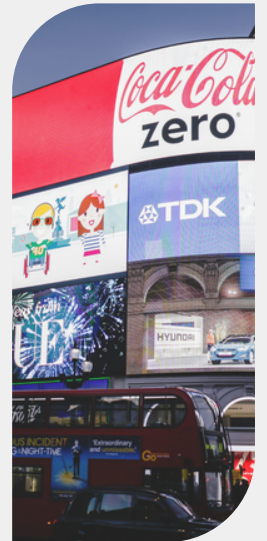

LED Display Walls are the large format screens based on LED technology composed of several cabinets capable of reproducing static pictures or video. It can be used in displaying your advertisements in various places like **Airports, Railway stations, Stadiums, Roof top and roadsides, Billboards, conferences and events.**

2. BENEFITS

- Better picture quality, longer lifespan and less environmental impact.
- Flexibility of installation i.e. it can be installed anywhere just like flex screen advertisement.
- We can display a wide variety of content such as promotions, news, product launches, dashboards and so much more- that too with easy management and controlling. We can increase the size of a video wall without having to replace the digital screen.

**LED display screens for outdoor available in
P3.79 mm, P4.8 mm, P6 mm**
