Our Products

Cocoa Powder

3M Suppliers an entire range of Cocoa Powders by using Cocoa Cakes which are sourced in origin countries. Our innovative technology and a fully computerized production process guarantee the consistency of quality needed to meet the individual requirements of our customers. Our Cocoa Powders range from the natural type, and from the light, medium and strongly alkalized types, to ultimately different kinds of red and black colours. For all our Cocoa Powder types, we have the manufacturing flexibility in place to adjust fat content, fineness and pH to the individual customers standards. Prior to producing the various types of Powder, we make a careful selection of Cakes from different origins and blend them in order to obtain the desired colour and flavour profiles. Our Cocoa Powders are being used in many main brands, all around the world.

Our Products

Freeze Dried Instant Coffee

In order to make available high quality product range, we make use of the finest grade raw material that is sourced from the trusted places after complete assurance of the quality. We effortlessly dispatch the product basket to the clientele as we have excellent, wide connectivity and trusted shipping facilities.

Acacia Gum

Gum Acacia is the all-natural ingredient of choice for the stabilization of soft drink flavor emulsions. Preparing a stable flavor emulsion for beverages firstly requires excellent raw materials and a thorough knowledge to obtain long-lasting stability in both the original concentrated emulsion and the diluted form. The best hydrocolloid to stabilize concentrates in beverages as well as oil in water systems. Also used for alcohol-free drinks, soft drinks and cordials. Various grades are available, depending on customer application. Acacia gum, also known as gum arabic, is a unique raw material which offers a large range of functional & nutritional properties. Thanks to more than 10 years of specialty ingredient expertise, 3M Suppliers

knows perfectly how to satisfy the demands and needs of the global food industry, by continually delivering all-natural functional ingredients with clean labeling and healthy benefits. Gum Acacia is also a source of fibre that is over 80% soluble, 100% natural and low in calories. Its low viscosity and absence of taste, makes it the foremost hydrocolloid in nutrition and in particular with regards to sugar-free confectionery products.

Our Products

Potato Starch

Potato starch is starch extracted from potatoes. The cells of the root tubers of the potato plant contain starch grains (leucoplasts). To extract the starch, the potatoes are crushed; the starch grains are released from the destroyed cells. The starch is then washed out and dried to powder. Potato starch contains typical large oval spherical granules; their size ranges between 5 and 100 μ m. Potato starch is a very refined starch, containing minimal protein or fat.

This gives the powder the following attributes :

- A clear white colour neutral taste, good clarity, high binding strength, long texture and a minimal tendency to foaming or yellowing of the solution.
- Potato starch contains approximately 800 ppm phosphate bound to the starch; this increases the viscosity, gives the solution a slightly anionic character, a low gelatinisation temperature and high swelling power.
- These typical properties are used in food and technical applications.

Our Products

Animal Feed Soybean Meal

Our company is can meet supplies for Soybeans meal for animal feed with below specifications with immediate effect.

Item Specification :

- Protein(Dry Basis) - 46%min
- Urease Activity - 0.05% max
