

vehicle separator

Some of the key challenges in the selection of sensors that are to be used with vehicle separators and height sensors include – cost, accuracy, range, ease of installation, reliability and ambient light immunity

We offer consulting and sourcing support for selecting sensors to aid vehicle separation on toll ways

We can help customers select amongst - standard photo sensors, retro-reflective sensors, light curtains for standard Vs over sized lanes for optimal performance
Custom designed drawings or enclosures available to aid easy installation on the field
