

JUBILANT IMPEX
DELIVERING EXCELLENCE

Jubilant Impex has been in the field of manufacturing Tube Fittings and Instrumentation Valves since decades. With a team of dedicated specialists, Jubilant Impex has always endeavoured to satisfy their customers ever widening demands with unmatched precision.

With the latest in-house machinery and infrastructure under one roof, Jubilant Impex is manufacturing a wide range of Tube Fittings and Instrumentation products in different sizes and metals as per the customer's specific requirements. After being in the forefront of domestic market, we have extended our reach globally, thus making India's presence felt on their international platform.

Instrumentation Tube Fittings

Jubilant Impex brand double ferruled instrumentation tube fitting are available in sizes range 1/16" to 1" & 1.5mm to 25mm with variety of end connections like NPT, BSP & BSPT. Available in SS316, Brass, Alloy-20, Inconel, Monel, Titanium, Hastelloy, Duplex, Super Duplex. Each fitting is precision machined cost exacting tolerance throughout manufacturing process.

Precision Pipe Fittings

Jubilant Impex brand high pressure precision pipe fittings are available in sizes range from 1/8" to 2" threads, with variety of end connections like NPT, BSP & BSPT. Available in SS316, Brass, Alloy-20, Inconel, Monel, Titanium, Hastelloy, Duplex, Super Duplex.

Jubilant Impex pipe fitting design is made as per highest quality standard and meets the requirement of ANSI B1.20.1 for (NPT) threads.

Manifold Valves

Jubilant Impex 2 valve, 3 valve, 5 valve, manifolds are available with remote or separate mounted. Jubilant Impex valves process & inst. connections are available with 1/2" NPT (F) threads.

2 valve manifold is for easy block or isolate and use calibration systems.

3 valve manifold is for 2 isolate & 1 equalizer for equalizing the high pressure & low pressure lines.

5 valve manifold consists of 2 isolate, 2 drain & 1 equalizer valves. Available in SS316, Brass, Alloy-20, Inconel, Monel, Titanium, Hastelloy, Duplex, Super Duplex.

Needle & Gauge Valve

Jubilant Impex Needle valves are specially design with packing below the threads. This design increases the life of packing & spindle threads.

Jubilant Impex Needle valves are available in size range of 1/8" to 1" with double ferrules tube connection, NPT, BSP, BSPT thread male/female connections with maximum working pressure 10,000psi. Available in SS316, Brass, Alloy-20, Inconel, Monel, Titanium, Hastelloy, Duplex, Super Duplex.

Pipe Clamp

Jubilant Impex pipe clamps are designed as per DIN 3015 Standard specifications. Our hydraulic pipe clamps assures strong and reliable support for your piping systems; absorbs shock, dampen vibration and reduces noise in hydraulic systems.

We offer several configurations in our pipe clamps, primarily being categorized into: Standard Series, Heavy Series, and Twin Series.

A standard clamp features a bottom plate that serves as base, polypropylene jaws that grip the tube or pipe, top plate that serves as support cover for the block clamp and a bolt that completes the assembly.

Quick Release Coupling

Jubilant Impex makes quick release coupling operates simply by one hand push action without twisting or wrenching, automatic shut off during disconnection minimises fluid loss.

- DOUBLE SHUT OFF COUPLINGS are used when positive shut off of both ends of pressurise lines is required.
 - SINGLE SHUT OFF COUPLINGS are used where only automatic shut off of socket end is required.
 - STRAIGHT THROUGH COUPLINGS are recommended for lines requiring maximum flow & without automatic shut off.
- MOC – SS304, SS316, CS plated, Aluminium.

Forged Steel Valves

Jubilant Impex Forged Steel Valves are available in size range from 1/2" to 2" with NPT, S/W, B/W and flanged end connections with gland packing – Grafoil, Graphite, Asbestos, PTFE.

Stem/Spindle – AISI316 / AISI410, Temperature varies as per packing material range from cryogenic upto 750°C. Class available – 800#, 1500#, 2500# Available in CS A105, SS, Alloy Steel, Duplex, Super Duplex, Monel, Inconel-625.

Instrumentation Ball Valve

Jubilant Impex Ball Valves are available in size from 1/8" to 1" with double ferrule, NPT, BSP, BSPT male/female, end connections. These valves are design for application on instrument lines, gas sampling lines, pneumatic systems, pilot plants, analyser labs, etc. These valves perform on/off functions.

Type: 2way, 3 way, 4way, 5way, 1 piece, 2 piece, 3 piece, Quarter turn, Half turn, Full turn i.e. 'T' port (full turn). Available in SS316, Alloy-20, Inconel, Monel, Titanium, Hastelloy, etc.

Condensate Pots

Jubilant Impex Condensate Pots are built as per customer's design in accordance with ASME codes. These pots are available in pipe threads, connections are 3000# to 6000# half coupling/socket weld connection mounted on 90 Degree angles (extra connections can be furnished on customer's requirements). MOC: Carbon Steel/Stainless Steel / Alloy Steel Pipes and weld caps. Available with electro polished, Zinc plated or special paint finish can be provided.

Instrument Air Header

Made as per customer's requirement, these Air Headers/distribution manifolds are equipped with VIRIGN Engineers make Needle / Ball Valves and prime quality materials.

These can be easily mounted on wall or on pipe stand and available upto 2x16 outlet with equal spacing & positioned to meet specific requirements. Available in SS304, SS316, C.S. & Alloy Steel.
