Year of Establishment  
**1990**

Since our inception in the year 1993, we "**SILVERTOAN PAPERS LIMITED**" are offering a wide range of Kraft Paper. Our range of products includes Kraft Paper, Kraft Board and Packing Paper with Annual Turnover of INR 250 crores and installed capacity of 1,15,500 MT TPA. We have successfully established itself as a most prominent enterprise in Kraft Paper Industry. Our manufacturing units are located at Muzaffarnagar (Uttar Pradesh) India and only 120 km. away from National Capital, New Delhi.

Empowered with a state-of-the-art infrastructure, we produce high strength kraft paper at leading industry prices. Most of our products are manufactured using agro-based raw materials and designed as per the prevalent market trends followed globally.

### **Our Mission**

Our mission is to provide cost-effective and reliable craft papers through a planned and organized delivery system in order to ensure complete benefit of our clients.

### **Our Vision**

Our vision is to become the most renowned supplier worldwide offering unparalleled services pillared on integrity and commitment.

### **Aim to be Eco Friendly Manufacturer**

Over the years—ever since the paper production industry came into existence, the use of wood to make pulp furnish the end product has led to the cutting of trees in large numbers. The trees that sustain our life have been treated dreadfully. However, the use of bagasse can solve these problems to a large extent. Since bagasse is a waste product of sugar industries, no more trees need to be cut for paper productions. Our Company uses Bagasse in manufacturing Papers. Bagasse is highly biodegradable. Even within the factory, bagasse has properties that require less chemical bleaching. It requires less bleaching chemicals than wood pulp to achieve a bright white sheet of paper. This leads to a reduction in the impact of chemicals like chlorine on the environment. At the same time, Our Company also uses Waste Papers (Recycling Paper) which reduces adverse effect on environment.

Hence, Our Company supports "Go Green Initiative" for long term Sustainable Development. Our aim is to make environment friendly papers by using agro-waste materials in order to provide benefits to the farmers as well as ecological system.

### **Environmental Policy**

Being a paper manufacturer, we understand our responsibilities towards society and environment. Hence, we operate through efficient equipments and technologies that are in conformation with the pertinent environmental norms. We don't cut trees to manufacture papers. Our effluent treatment plant meets the entire norms set by Pollution Control Boards.

### **Opportunities in Paper Segment**

The ban on plastic bags in the State has turned out to be a boon for manufacturers of paper bags. Paper bags are being seen as the obvious replacement for plastic carry bags.
