S.J.Industries was established in the year 2013. S.J.Industries offer manufacturer, exporter and supplier of Construction Equipment, Material Handling Systems, Concrete Mixers, Lifting Equipment, half bag concrete mixer, bag concrete mixer, Concrete Mixer with Hydraulic Hopper, Tower Hoist Lift, mini lift for construction. Our quality products are well known for their unique features like durability, dimension stability, sturdy construction, easy operations, corrosion resistance, abrasion resistant, low maintenance, low power consumption and high performance. Our high-end quality products are manufactured using proficient components and perfect designs to ensure their hassle free functioning, even under rigid conditions. Their production process utilizes superior quality raw material and inputs from modern machines and technology.

Potent infrastructure forms the strong base of the company. We are backed with modern and well-planned infrastructural facility which is operational with high-end equipment, advanced technology and modern machines. We have properly segregated our infrastructural facility into various units to ensure streamlined work processes. Our manufacturing unit is fully-functional with modern machines and advanced technology which aids in bulk production of our superior quality products.

Under the proficient leadership and management of Mr. Sikandar N. Pansare & Mr Jagdish Pathak, our mentor, the company has established a strong foothold in the industry. Owing to his able guidance and leadership qualities, we have risen as the leader amid the cut throat competition prevailing in the Material handling and construction equipment market.

Satisfying the client is the main aim of the company. The company follows customer-oriented approaches and deal in ethical business policies. For our client's delight, we offer finest quality goods at comparatively cheaper rates; customization facility is provided which is according to the needs and requirements of the customer. Not only this, the company offers efficient after sales support to the customers. Our workforce draws its inspiration from our mentor and continuously put in valiant and diligent efforts in proffering quality products in the market. Our workforce comprises of highly-skilled and trained personnel. These personnel are well experienced and have a proper knowledge about their area of specialization. Our employees work in close cooperation and maintain a harmonious relation with other team mates, there by ensure high efficiency and streamlined workflow.

Our quality assured production has proved useful to the company as well as it offered a substantial edge above our opponents. Quality levels are all time high during every phase of product development process. Finest quality raw material is procured from the reputed and most established market vendors. Our manufacturing process passes through a series of stringent quality monitoring tests to ensure that these products are free from any of the fault or manufacturing defect. We have an experienced Research and development department, who keeps a strict vigil on the changing market trends and varying demands of the customer. Our R & D personnel are regular with the market survey and act like a guiding star for the company and its associated work force.

Quality Standards

Quality is of the prime concern to the company. Due to our quality assured products, we are able to outshine our competitors in the market. We make use of the superior quality raw material, which is been procured from the reputed market vendors. Their production process passes through a series of quality monitoring checks to ensure flawless delivery of the products. Global Standards have been inculcated in our designs to offer finest quality products to the clients.

Our manufactured products are checked on the basis of following parameters :

- Designs
- Power consumption
- Accuracy
- Efficiency
- Dimensions

Infrastructure

Our company has a well-planned infrastructural facility. To ensure streamlined and hassle free work flow, we have segregated our infrastructure into various units. These units are well-functional with modern machines, advanced tools and high-end equipments, which aids in fulfilling bulk consignments effectively.

Our manufacturing unit has a large manufacturing capacity which is fully operational with high-end machines and technologically advanced equipments. Our warehousing unit is capacious and aids in effective storage and quicker transit.

Some of our fully-functional machines includes :

- Lathe machine
- Drill machine
- Horizontal boring machine
- Shaper machine
- Compressor for painting
- Welding rectifier

Warehousing

The company is aided with strong and capacious warehouses to ensure proper storage of our manufactured machines. We have properly segregated our warehouses on basis of categorization and product labeling, which ensures proper management and aids in prompt deliveries. Our ware houses are well-connected via roads and are kept free from moisture, rodents and pest. These warehouses are evenly manned by experienced warehousing experts.

We Offer :

- Concrete Mixers
- Lifting Equipment
- half bag concrete mixer
- bag concrete mixer
- Concrete Mixer with Hydraulic Hopper
- Tower Hoist Lift
- mini lift for construction
- Soil Compactor
- Sand Screen machine
- Rotary Sand Screen
- Fly Ash Brick Machine
- Fully automatic Fly Ash Brick Machine
- Liquid Colour Mixer
- Table Vibrator
- Block Laying Machine
- Block Making Machine

Client Satisfaction

We follow a Client-centric approach. Finest quality manufactured products are been offered which find their utilization in various industries. The company offers effective customization facility which is according to the demands and requirements of our esteemed customers. Proper after sales support is being offered which include Onsite support, user manuals, installation and operational training. Keeping in mind the client's ease, the company has opened the doors of easy and hassle free modes of transactions like cash, cheque, credit card and demand draft. All of the endeavors made by the company are directed towards offering maximum client satisfaction.

Team of Experts

Our team comprises of highly-skilled and trained professionals, who leaves no stone unturned in offering the supreme quality products in the market. These professionals dwell from different background and are having complete knowledge about their specific work domain. Our employees work in close combination with one another to ensure synchronized work environment which further aids in streamlined work processes

Our workforce comprises :

- Technocrats
- Engineers
- Warehousing experts
- Research and development personnel
- Quality controllers
- Marketing professionals
- Sales and marketing executive
- Packaging experts

Application Areas

With the inputs from modern machinery and advanced equipments, we are able to fulfill the demands of bulk consignments. Quality of the products is maintained and customization process is fastened. Superior quality products are delivered at the client's end which are faultless and are easily operational. Our products are in high demand and their services are utilized in various sectors.

Our products find their usage in :

- Engineering industry
- Construction industry
- Automobile industry
- Electrical and electronic industry

Why Us?

Being one of the prominent supplier of high-end construction and material handling equipment, we have established a strong market foothold. Following customer-oriented approaches and dealing in transparent business policies, the company is able to cater to wide range of diverse client base.

Our unique strengths include :

- Quality products
- Customized solutions
- Well-built infrastructure facility
- Prompt delivery
- Effective quality control management
- Transparent business practices
- Broad distribution network
