Starting its operations in the year 2019, we at Rasayanik started manufacturing and importing chemical products. Our product list comprises Calcium Hypochlorite Granules, aluminium sulphate granules, and TCCA 90 Trichloroisocyanuric Acid Granules. All the products are guaranteed to be of the best quality. We are based in Mumbai, Maharashtra (India).

### **Our infrastructure**

The company has a large, well-appointed infrastructure with advanced facilities. The company is also engaged in providing custom and tailor-made products to fulfil the needs of its supporters. Supported by a large warehouse, we deliver our customer's products on time and in the right place. We also have an outstanding marketing and sales team working in a professional way worldwide.

### **Our Team**

Our successful and prominent status in the industry is due to our founder, who has profound knowledge and expertise in this area. His effective team management assists the whole team in working in a professional way.

Moreover, our best collection of products is stringently checked by our team of quality controllers, who analyse the raw materials and finished range to make sure that the final collection is of matchless quality and helpful for the end users. Before making the final delivery, we properly test the quality of the products. We make sure of the flawless delivery of the products within no time. The professional customer services at Rasayanik are available to serve your needs at their best.
