

TINY PRESSURE PUMPS

Malhar high-pressure pump is mainly used for Ro water Treatment plants, Boiler Feed and Ironing tables, Misting, Fogging, Outdoor Cooling, Filtration, Poultry Etc. Water treatment is a process of treating water with TDS, harness to purify drinking water. Malhar pumps have been focusing on manufacturing quality high-pressure pumps both in Monoblock high-pressure pump types and vertical multistage pump types. Reverse Osmosis Plants use high-pressure pumps to transfer raw water to portable water with high pressure. Malhar pumps always produce the best quality reliable pumps at affordable prices. Malhar pumps have various product ranges like high-pressure pumps suitable for 50, 100 Ltrs Ro plants, 250 Ltrs Ro plants, and 500 Ltrs Ro plants in Monoblock type.

APPLICATION

RO Water Plants.
Water Treatment Plants.
Boiler Feed Pumps.

OPERATING RANGE

Pressure : upto 15 Bars
Flow : upto 2000 lph
HP : 0.5 HP, 1 HP, 2.0 HP,
Single Phase 230v, 50 z

FEATURES

Suitable For 50,100,250,500,LPH RO Plants.
230V, AC, Single
415V, AC 3 Phase
Class F Insulation
