BEGINNING OF A NEW ERA OF TECHNOLOGY

TORNADO FLUSHING

Rectangle Western Closet(WC) has two or more nozzles that create a centrifugal action. Where the water flows in anticlock wise with downward pressure. This cyclonic action reduces waste buildup and keep the WC cleaner. It is more effective in one flush than most toilets are with multiple flush. And water saving is more than 40% compared with traditional toilets.

TORNADO FLUSHING

SIPHONIC FLUSHING

SIPHONIC FLUSHING

A gravity flush system uses vacuum to pull waste from the toilet bowl through the trapway and into the outline. This is done by the shape of the trapway acting as a siphon. Siphonic toilets tend to have a cleaner bowl and are easier to clean.

RIMLESS

A rimless toilet is simply a toilet without a traditional rim. A direct flush technique shoots water around the edge of a smooth pan. As there is no rim, rimless toilets are easy to clean and more hygienic than a traditional toilet. It is far more powerful flush and more economical than traditional rimmed toilets.

TRADITIONAL DESIGN

RECTANGLE DESIGN

SOFT CLOSE

TAKE-OFF SYSTEM

HIDDEN FIXING SYSTEM

GLAZED SIPHON

ANTIBACTERIAL COATING

OPTIMUM HYGIENE IN THE BATHROOM WITH ANTIBACTERIAL COATING.

Efficient imported chemical is used on the ceramic coating. This AntiBacterial coating which is fired directly into ceramic products for protection throughout the product's life. It remains clean and Germ-free..

Anti Bacterial

More Hygienic

More Ecological

WATER SAVING

Our WCs have a special bowl structure and are specifically designed to flush with both lower (2.5/4 litre) and typical (3/6 litre) water volumes. By using less water, these water saving WCs benefit you and the environment. All water standard height wall-hung frames come with dual flush function as standard in both 2.5/4 litre and 3/6 litre options

SPACE SAVING

A wall-hung WC takes up less room space than a conventional WC and the concealed installation offers flexibility in confined spaces. The range of compact WCs have shorter projection, saving even more space.

ACCESSIBLE

These products are wheelchair accessible and provide enhanced in the bathroom

WASH BASIN FORMS

Wash basin can be used with a pedestal as well as being wall-hung. Basins suitable for use with a counter top can be fitted in three alternative ways

FISHER

A simple, elegant installation system for use with wall hung WCs. The fixings are hidden from sight by the use of internal ABS sleeves, creating a clean, smooth design

**MAINTENANCE**

Like any other part of your house, the bathroom can be made to look great and made to last if it is taken care of regularly. To make your bathroom beautiful here are some invaluable tips.

WASH BASIN

A mild detergent can be used to wash the basin at least once a day. After washing, the basin should be wiped out clearly to avoid water stains.

CLOSETS

Cleanser like Harpik can be used to clear the closet with soft plastic brush, at least once a day.

To avoid minute discoloring, after flushing the toilet give it a once over with the soft brush.

Keep the toilet brush handy in a convenient stand nearby.

In Case of toilets and basins, if there has been no maintenance since long period of time, water deposits and discoloration can form on the surface of areas that get wet. In such cases, these stains / marks can be removed with the help of a solution of dilute hydrochloric acid.

Clean with a soft cotton cloth and warm water with soap.

Do not use thinner, dry cleaning liquids or powder paste. Use a liquid cleaner at least twice a week.

Use Brasso or car rubbing compound and then polish with a cloth to remove fine scratches.

ALL WESTERN CLOSET WAS TESTED BY VACUUM MACHINE

(Advanced Technology has been used to check the leakage of the toilets)
