## Indian Yellow Akarkara Cultivation Project

**Introduction:** Indian Akarkara (*Spilanthes Acmella*) belonging to family Asteracea is a small herbal plant which grows at a height of 2 -3ft.

**Uses:** It is used to treat toothaches, stomatitis and skin diseases.

**Cultivation:** Akarkara plant grows well in well-drained black or sandy loam soil. The land is thoroughly ploughed and levelled to clean and remove the unwanted plants. Land should be well irrigated before sowing.

Akarkara can be propagated through seeds. Akarkara is planted on the month of Aug with a spacing of 12 inches (PXP). Akarkara starts flowering after 8-12 weeks of planting and the plant gets fully mature after 6 months which is then harvested. In 1 acre of land the estimated production of Akarkara is 1000kg.

**Marketing:** The demand of Akarkara flowers has been increasing all over the world due to its beneficial uses in health care.

Distance (in acre)	Seed (in land)	Cost of Seed (per kg)	Total	Other Expenses (As Per Requirement)	Cost of cultivation
1*1ft	5Kg	2,000/- per kg	5kg*2000=10,000/-	Fertilizers Land preparation Labor expenses etc.	10,000/-
<b>Total Cost of Cultivation: 10,000/-</b>					

INCOME FOR FARMING OF INDIAN AKARKRA ROUTS 1ACRE					
Month	Production	Production/kg (Approximated)	Rate	Revenue	Remarks
6	Dry routs	1000	100/-	1,00,000/-	Production start in 6 month
	Yellow Flower	500	80/-	40,000/-	
<b>Total</b>				<b>1,40,000/-</b>	

## ➤ Technical Support & Services:

**W**e also provide technical support for farming. Our Service Department with technically qualified staff provide after sales service and farmers advisory services to our customers to get better plant establishment and faster growth of Herbal and Horticultural plantations.

We have largest network of employees who deliver Plants to customers at their door steps. Free technical services to customers on planting method, management practices and plant protection measures. Our teams of Agricultural Experts periodically visit and supervise the plantations and suggest necessary guidelines to get better growth and higher returns. Services:

### **Terms & Condition**

- Indian Akarkra growing first harvesting practical training.
- First production starts in 6 month.
- Plantation cost is to be borne only once and then for 6 month yield can be extracted.
- This includes supervision, consultancy, guidance, on Call
- Buy back MOU of Indian Akarkra dry roots
- The income expenditure indicated by the company is an approximated figure, as it also depends on the nature and hard work of the farmer

**(“Look deep into nature,  
and then you will understand everything  
better”)**
