

1. Goat Contract Farming

Osmanabadi

COST AND BENEFITS Omarabadi (1) Batch 10 females and 1 male investment -1,30,000,

after 2 years farmer will get minimum 30 kids and

How about 30 kids, 5 kids may mortality So we will consider 25 kids.

Every breeding purpose goats weights around 25kg per So, if we sell those kids we will get live weight (Breeding purpose)

400 rupees per KG farmer will get (25kg per goat * 400 rupees = 10,000 per kid goat)

(Over all – 25 goat kids *10,000 = 2,25,000).

Parents goat are 11 ,

income of Parents goats will weight around 45kg per goats.

Total initial 11 goats * 45= 495KG. 495kg weight (Cutting purpose) * 450 rupees = 2,22,750)

Expenses of feeding and investment for breeding goat and others = 1,30,000 and 75,000

and 25,000,

Finally, Farmer will get over all approx. $+2,25,000 + 2,22,750 - 1,30,000 - 75,000 - 25,000 = 2,17,750$.

Beetle

AND BENEFITS beetle 1 Batch (10 females and 1 male)

Investment -1,70,000,

After 2 years farmer will get minimum 20 kids and farmer will get,

How about 20 kids, 5 kids may mortality So we will consider 15 kids,

Every breeding purpose goats weights around 45kg per So, if we sell those kids we will get live weight (Breeding purpose),

550 rupees per KG farmer will get (45kg per goat * 550 rupees = 24,750 per kid goat)

(Over all – 15 goat kids * 24,750 = 3,71,250),

Parents goat are 11 ,

Income of Parents goats will weight around 75kg per goats,

Total initial 11 goats * 75kg = 825KG. 825kg weight (Cutting purpose) * 450 rupees = 3,71,250) ,

Expenses of feeding and investment for breeding goat and others = 1,70,000 and 1,50,000 and 25,000,

Finally, Farmer will get over all approx. $+3,71,250 + 3,71,250 - 1,70,000 - 1,50,000 - 25,000 = 3,97,500$.

Sirohi

BENEFITS Sirohi 1 Batch (10 females and 1 male)

Investment -1,50,000,

After 2 years farmer will get minimum 20 kids and farmer will get,

How about 20 kids, 5 kids may mortality So we will consider 15 kids,
